

European Maritime and Fisheries Fund 2021–2027

2018/0210(COD) - 18/03/2019 - Committee report tabled for plenary, 1st reading/single reading

The Committee on Fisheries adopted the report by Gabriel MATO (EPP, ES) on the proposal for a regulation of the European Parliament and of the Council on the European Maritime and Fisheries Fund and repealing Regulation (EU) No 508/2014 of the European Parliament and of the Council.

The committee recommended that the European Parliament's position adopted at first reading under the ordinary legislative procedure should amend the Commission's proposal as follows.

Subject matter

This Regulation establishes the European Maritime and Fisheries Fund (EMFF). It lays down the priorities of the EMFF, the budget for the period 2021-2027, the forms of Union funding and the specific rules for providing such funding, complementing the general rules applying to the EMFF under Regulation (EU) No [Regulation laying down Common Provisions].

Priorities

The EMFF shall contribute to the implementation of the CFP and of the maritime policy. It shall pursue, *inter alia*, the following priorities:

- fostering sustainable fisheries;
- fostering sustainable aquaculture;
- contributing to food security in the Union through competitive and sustainable fisheries and aquaculture markets and processing sectors;
- enabling the growth of a sustainable blue economy, taking into account the ecological carrying capacity, and fostering prosperity and economic and social cohesion in coastal, island and inland communities.

Financing

The financial envelope for the implementation of the EMFF for the period 2021-2027 shall be increased to EUR 6 867 000 000 in 2018 constant prices (i.e. EUR 7 739 000 000 in current prices).

Budgetary resources under shared management

The part of the financial envelope under shared management shall be 87 % of the EMFF financial envelope.

At least 15% of the Union financial support allocated per Member State shall be allocated to control and enforcement and the collection and processing of data for fisheries management and scientific purposes.

At least 10% of the Union financial support allocated per Member State shall be allocated to the protection and restoration of marine and coastal biodiversity and ecosystems and for marine knowledge.

At least 10% of the Union financial support allocated per Member State shall be allocated to improving the safety, working and living conditions of the crew, training, social dialogue, skills and employment. However, the Union financial support from the EMFF allocated per Member State for all investments on board shall not exceed 60% of the Union financial support allocated per Member State.

The Union financial support from the EMFF allocated per Member State to the areas of management of fisheries and fishing fleets and extraordinary cessation of fishing activities shall not exceed the higher of the following two thresholds: (a) EUR 6 000 000; or (b) 15% of the Union financial support allocated per Member State.

Budgetary resources under direct and indirect management

The part of the financial envelope under direct and indirect management shall be 13% of the EMFF financial envelope.

Outermost regions

Members proposed that for operations located in the outermost regions, each Member State concerned shall allocate, within its Union financial support:

- EUR 114 000 000 in 2018 constant prices (i.e. EUR 128 566 000 in current prices) for the Azores and Madeira;
- EUR 91 700 000 in 2018 constant prices (i.e. EUR 103 357 000 in current prices) for the Canary Islands;
- EUR 146 500 000 in 2018 constant prices (i.e. EUR 165 119 000 in current prices) for Guadeloupe, French Guiana, Martinique, Mayotte, Réunion and Saint-Martin.

Action plan for small-scale coastal fishing

In order to alleviate the administrative burden on operators applying for aid, Member States shall endeavour introducing a single Union simplified application form for EMFF measures.

Parliament also proposed to facilitate access to credit, insurance products, and financial instruments and to improve the health, safety and working conditions on board fishing vessels, thereby making it possible to attract more young people and significantly reduce the causes of marine incidents.

Management of fisheries and fishing fleets

Fishers, including owners of fishing vessels and crew members, who have worked at sea for at least 90 days per year during the last two calendar years preceding the date of submission of the application for support, on board a Union fishing vessel concerned by the permanent cessation may also benefit from the support. The fishers concerned shall completely cease all fishing activities. The beneficiary shall provide proof of the complete cessation of fishing activities to the competent authority.

The compensation shall be refunded by the fisher on a pro rata temporis basis where that fisher returns to a fishing activity within a period of less than two years from the date of submission of the application for support.

Compensation for additional costs

The EMFF may support the compensation of additional costs incurred by beneficiaries in the fishing, farming, processing and marketing of certain fishery and aquaculture products from the outermost regions.

Members proposed that the compensation shall be proportionate to the additional costs it intends to offset. The level of compensation in respect of the additional costs shall be duly justified in the compensation plan. However, the compensation shall not in any event exceed 100 % of the expenditure incurred.
