

Safety requirements: cableway installations intended to carry passengers

1994/0011(COD) - 12/10/1999

The committee adopted the draft recommendation for a second reading (codecision procedure) by Bill MILLER (PES, UK). The report approved the proposal and tabled a small number of amendments to the common position designed mainly to extend the directive to cover all forms of passenger transport (for example, cable cars used to transport employees to high-altitude observatories), not just the transport of paying passengers.
