Summary

Control measures applicable to fishing for certain stocks of highly migratory fish: regional fisheries organisations' recommendations

2002/0186(CNS) - 14/07/2003 - Legislative proposal

The Commission presents an amended proposal as a result of changed circumstances. The ICCAT at its 17th meeting in 2001 and IOTC at its 6th regular meeting in 2001 recommended new control measures for certain stocks of highly migratory species. The Council has not yet adopted the

proposal for a Regulation amending Regulation 1936/2001/EC in order to transpose into Community law the technical measures adopted by ICCAT and IOTC at these meetings. ICCAT at its 13th special meeting (Bilbao, 28 October-4 November 2002) and IOTC at its 7th ordinary meeting (Victoria, Seychelles, 2-6 December 2002) adopted further control measures for certain highly migratory Atlantic and Mediterranean stocks. These should also be transposed into Community law. This amended proposal seeks to amend Regulation 1936/2001/EC in order to transpose both the 2001 and 2002 recommendations into Community law.

Control measures applicable to fishing for certain stocks of highly migratory fish: regional fisheries organisations' recommendations

2002/0186(CNS) - 24/07/2002 - Initial legislative proposal

PURPOSE : to amend Regulation 1936/2001 on control measures on fishing for certain stocks of highly migratory fish. CONTENT : The EC participates in a number of regional fisheries organisations (RFOs) which provide a framework for regional cooperation on the conservation and management of fishery resources. Since 14 November 1997, the Community has been a Contracting Party to the International Convention for the Conservation of Atlantic Tunas (the ICCAT Convention.) The Community has also approved the Agreement for the establishment of the Indian Ocean Tuna Commission (the IOTC). The control measures adopted by the ICCAT and IOTC were transposed by Council Regulation 1936/2001. New control measures have been adopted by the ICCAT for certain stocks of highly migratory species in the Atlantic and Mediterranean, and by the IOTC for such species in the Indian Ocean. The purpose of this proposal is thus to transpose these new measures into Community law by amending the above-mentioned Regulation.

Control measures applicable to fishing for certain stocks of highly migratory fish: regional fisheries organisations' recommendations

2002/0186(CNS) - 26/04/2004 - Final act

PURPOSE : to incorporate the recommendations and the resolutions of ICCAT and ICOT respectively into Community law. LEGISLATIVE ACT : Council Regulation 869/2004/EC amending Regulation 1936/2001/EC laying down control measures applicable to fishing for certain stocks of highly migratory fish. CONTENT : the International Commission for the Conservation of Atlantic Tunas (ICCAT) had adopted a number of recommendations and the Indian Ocean Tuna Commission (IOTC) had adopted a number of resolutions creating control and surveillance obligations, which have been transposed in Regulation 1936/2001/EC. ICCAT and IOTC recently recommended new control measures for certain stocks of highly migratory species. These recommendations and resolutions are binding on the Community. This Regulation implements those recommendations and resolutions and amends Regulation 1936/2001/EC accordingly. ENTRY INTO FORCE : 07/05/04.

Control measures applicable to fishing for certain stocks of highly migratory fish: regional fisheries organisations' recommendations

2002/0186(CNS) - 13/01/2004 - Text adopted by Parliament, 1st reading/single reading

The European Parliament adopted a resolution drafted by Patricia McKENNA (Greens/EFA, IRL) making one amendment to the proposal. (Please see the document of 25/11/03).
