Update of the list of waste in relation to battery-related waste

2025/2601(DEA) - 28/06/2007

The Council reached a unanimous political agreement on a draft directive on waste. As a result of the debate, the following modifications were inserted in the text:

Article 9 paragraph 1a is replaced by: "When the waste is transferred from the original producer or holder to one of the natural or legal persons referred to in paragraph 1 for preliminary treatment, the responsibility for carrying out a complete recovery or disposal operation is not discharged as a general rule. Without prejudice to Regulation (EC) 1013/2006 on shipment of waste, Member States may specify the conditions of responsibility and [...] decide in which cases the original producer shall retain responsibility for the whole treatment chain or in which cases the responsibility of the producer and the holder can be shared or delegated among the actors of the treatment chain."

Article 10 paragraph 1, second subparagraph is replaced by: "In derogation from Regulation (EC) 1013/2006 on shipment of waste, Member States may, in order to protect their network, limit incoming shipments of waste destined to incinerators that are classified as recovery, where it has been established that such shipments would have the consequence that national waste [...] would have to be disposed of or that waste would have been treated in a way that is not in coherence with their national waste management plan. The Member States shall notify such a decision to the Commission. The Member States may also limit outgoing shipment of waste on environmental grounds as set out in Regulation (EC) 1013/2006 on shipments of waste."

Add a new paragraph 4 in Article 10: "The principles of proximity and self-sufficiency do not mean that each Member State must possess the full range of final recovery facilities within that Member State."

Add new recital in relation to Article 10: "For the purposes of the application of the Regulation (EC) 1013/2006 on shipments of waste, mixed municipal waste as referred to in Article 3(5) of that Regulation remains mixed municipal waste even when it has been subject to a waste treatment operation that has not substantially altered its properties."

Article 25a paragraph 1 is replaced by: "The Commission may, in accordance with the procedure referred to in Article 36(1a), adopt technical minimum standards for treatment activities which require a permit according to Article 19 where there is evidence that a benefit in terms of protection of human health and the environment [...] would be gained from such minimum standards."

Article 26a paragraph 3 is replaced by: "Member States shall determine appropriate specific qualitative or quantitative benchmarks for waste prevention measures adopted in order to monitor and assess the progress of the measures and may determine specific qualitative or quantitative targets and indicators, other than those referred to in paragraph 3a, for the same purpose."

Update of the list of waste in relation to battery-related waste

2025/2601(DEA) - 09/03/2006

The Council held a policy debate on a thematic strategy on the prevention and recycling of waste and a proposal for a Directive on waste, covering in particular the aim of the thematic strategy and the adequacy of the proposed measures at EU and national levels for meeting the policy aim of the thematic strategy.

The delegations generally welcomed the strategy and its objective of transforming the EU into a "recycling society" while expressing their opinion on some specific aspects of the Commission proposal, such as waste hierarchy, waste prevention and legislative measures.

The outcome of the debate should provide guidance for further Council's work.
