Final act
Regulation 1996/736 OJ L 102 25.04.1996, p. 0001 Summary

Investment projects of interest to the Community in the petroleum, natural gas and electricity sectors

- OBJECTIVE: to remedy the problems encountered in connection with the implementation of Regulation (EEC) No 1056/72 on notifying the Commission of Community investment projects in the petroleum, natural gas and electricity sectors and to ensure that the information collected is as useful as possible. - SUBSTANCE: The Commission proposed repealing Regulation (EEC) No 1056/72, as amended by Regulation (EEC) No 1215/76, and reformulating it in a new regulation incorporating the amendments which it judged necessary. The proposal: . emphasized that the information gathered pursuant to the regulation was needed for the Commission's on-going activities and that these data constituted the only source of official information available to the Commission's services on developments in production, processing and transmission capacity in the electricity, petroleum and natural gas sectors; . leaves Member States free to decide the means they use to provide the information required to meet the objectives set out in the regulation; . amends the dates for the provision of data (15 April and 15 March instead of 15 February and 15 January); . reduces the list of data specified in the Annex to the regulation. The Commission will revise the regulation when experience shows that further amendments are needed in order to increase its effectiveness. ?

Investment projects of interest to the Community in the petroleum, natural gas and electricity sectors

The ESC welcomed the reformulation of the existing legislation in a new regulation on investment projects of interest to the Community in the

petroleum, natural gas and electricity sectors. It considered, however, that the information required under the regulation should comply solely with the requirements of energy policy and equipment manufacture planning; this would help to improve environmental protection. The ESC welcomed the amendments made as regards the reduction of the quantity of information required and the extension of the deadlines for reaching the Commission. It also urged the Commission to: - facilitate the functioning of the internal market in energy; - respect the principle of administrative transparency and simplification in the procedure for obtaining information; - revise Regulation (EEC) No 3025/77 and include Parliament and the Economic and Social Committee among the recipients of the report to be published; - extend the notification requirement to thermal power stations with a capacity below 200 MW.

Investment projects of interest to the Community in the petroleum, natural gas and electricity sectors

In adopting the report by Mr SCAPAGNINI (FE, I), the European Parliament approved this proposal for a regulation without amendment. ?

Investment projects of interest to the Community in the petroleum, natural gas and electricity sectors

As part of the ongoing exercise to simplify Community energy legislation, the Council held an exchange of views on the proposal for a Council Regulation on notifying the Commission of investment projects of interest to the Community in the petroleum, natural gas and electricity sectors (recasting of Regulations (EEC) No 1056/72 and No 1215/76). Noting that its members were favourably disposed towards both the proposal and the repeal of the acts in question, the Council instructed the Permanent Representatives Committee to finalise work in the light of Parliament's recent opinions.

Investment projects of interest to the Community in the petroleum, natural gas and electricity sectors

OBJECTIVE: to remedy the problems encountered in connection with the implementation of Regulation (EEC) No 1056/72 on notifying the Commission of investment projects of interest to the Community in the petroleum, natural gas and electricity sectors, and to ensure that the information collected is as useful as possible. COMMUNITY MEASURE: Council Regulation (EC) No 736/96 on notifying the Commission of investment projects of interest to the Community in the petroleum, natural gas and electricity sectors. SUBSTANCE: The Council regulation replaces, and reformulates with the addition of the necessary changes, Council Regulation (EEC) No 1056/72 as amended by Regulation (EEC) No 1215/76. The regulation: - stresses that the information gathered pursuant to the regulation is needed for the Commission's on-going activities and that these data constitute the only source of official information available to the Commission's on developments in production, processing and transmission capacity in the electricity, petroleum and natural gas sectors; - leaves Member States free to decide the means they use to provide the information required to meet the objectives set out in the regulation; - requires the Member States to communicate to the Commission, before 15 April of each year, the information they have obtained concerning investment projects; Member States should add to their communications any comments they may have; - requires the persons and undertakings concerned, before 15 March of each year, to communicate details of investment projects to the Member States in whose territory they are planning to carry them out; - provides that, with regard to investment projects planned or in progress, any communications should indicate: the precise purpose and nature of such investments, the planned capacity for power, the probable date of commissioning and the type of raw materials used. As regards any proposed withdrawals from service, communications should indicate: the nature and the capacity or power of the installations concerned and the probable date when the installations will be withdrawn from service. At the end of the period of five years, the Commission is required to submit to the Council a report on the implementation of the regulation, to be accompanied by the requisite proposals. ENTRY INTO FORCE: 25 April 1996.?
