Final act
Decision 2003/793 OJ L 296 14.11.2003, p. 0020-0021 Summary

International registration of marks: EC accession to the Madrid protocol

OBJECTIVE: the object of the proposal for a Council Decision is to establish a link between the Community trademark system and the international registration system established under the Madrid Protocol, adopted on 27 June 1989. SUBSTANCE: the Council is invited to approve the Madrid Protocol. The Madrid Protocol provides for the international registration of marks at the International Bureau of the World Intellectual Property Organization (WIPO) at Geneva. It has the same objectives as the Community trademark system, although they are achieved by different means. Whereas the Community trademark system provides for a complete and unified regional trademark registration system which covers the whole territory of the European Community, the Madrid Protocol introduces a single procedure for filing applications for registration, which potentially affects all the Contracting Parties to the Paris Convention (over 110 states). The two systems are thus complementary. The establishment of a link between the two would permit businesses to enjoy the advantages of the Community trademark through the Madrid Protocol and vice versa. ?

International registration of marks: EC accession to the Madrid protocol

The Committee has approved the recommendation of its rapporteur (Manuel MEDINA ORTEGA (PES, E) in favour of the European Community's accession to the Protocol to the Madrid Agreement concerning the international registration of trademarks.

International registration of marks: EC accession to the Madrid protocol

In adopting the report by Mr Manuel MEDINA ORTEGA (PSE, E), Parliament approved the accession of the European Community to the

International registration of marks: EC accession to the Madrid protocol

The rapporteur stated that the fairly complicated mechanics of the approval procedure for the Madrid Protocol required a Council decision for the EU's accession, prior to the amendment of Regulation (EC) No 40/94 which had introduced the Community trade mark. This amendment was needed so that there was a link between the international and Community systems for the registration of trade marks. Noting that the Committee on Legal Affairs had adopted the Commission's proposal without amending this, Commissioner Monti indicated the benefits to the single market and European industry of this link between the two parallel trade mark protection systems.

International registration of marks: EC accession to the Madrid protocol

PURPOSE : to establish a link the Community trademark system and the international registration system established under the Madrid Protocol, adopted on 27 June 1989. **LEGISLATIVE ACT :** Council Decision 2003/793/EC approving the accession of the European Community to the Protocol relating to the Madrid Agreement concerning the international registration of marks, adopted at Madrid on 27 June 1989. **CONTENT :** the Council adopted a Decision approving the accession of the European Community to the Protocol to the Madrid Agreement concerning the International Registration of Marks and the Regulation (please refer to CNS/1996/0198) giving effect to this accession by modifying the Community trade mark system accordingly. By adopting these acts, it will be possible for firms to profit from the advantages of the Community trade mark through the Madrid Protocol and vice versa by allowing Community trade mark applicants and holders of such trade marks to apply for international protection of their trade marks through the filing of an international application under the Madrid Protocol and, conversely, holders of international registrations under the Madrid Protocol to apply for protection of their trade marks under the Community trade mark system. The establishment of a link between the Community trade mark system and the International registration system under the Madrid Protocol is expected to promote a harmonious development of economic activities, eliminate distortions of competition, be cost efficient and increase the level of integration and functioning of the internal market. The Madrid Protocol was adopted in order to introduce certain new features into the system of the international registration of marks existing under the Madrid Agreement concerning the international registration of marks of 14 April 1891 as amended (hereafter referred to as "the Madrid Agreement"). The objectives of the Madrid Protocol are to ease the way for certain States, and in particular the Member States which are not currently parties thereto, to accede to the system of international registration of marks. As compared to the Madrid Agreement, the Madrid Protocol introduced, in its Article 14, as one of the main innovations, the possibility that an intergovernmental organisation which has a regional office for the purpose of registering marks with effect in the territory of the organisation may become party to the Madrid Protocol. The possibility that an intergovernmental organisation which has a regional office for the purpose of registering marks may become a party to the Madrid Protocol was introduced in the Madrid Protocol in order to allow, in particular, for the European Community to accede to the said Protocol. The Madrid Protocol entered into force on 1 December 1995 and became operational on 1 April 1996 and the Community trade mark system also became operational on the latter date. The Community trade mark system and the international registration system as established by the Madrid Protocol are complementary. Moreover, the establishment of a link between the Community trade mark system and the international registration system under the Madrid Protocol would promote a harmonious development of economic activities, will eliminate distortions of competition, will be cost efficient and will increase the level of integration and functioning of the internal market. Therefore, the accession of the Community to the Madrid Protocol is necessary in order for the Community trade mark system to become more attractive.?
