Control measures adopted by the Northwest Atlantic fisheries organisation NAFO (amend. Regul. 189/92/EEC)

OBJECTIVE: approval of new control measures adopted by the NAFO Fisheries Commission and applicable to Community fishing vessels operating in the NAFO Regulatory Area. SUBSTANCE: In September 1996 the NAFO Fisheries Commission adopted the introduction of new control measures, which the Community now has to approve. Among the measures agreed is a proposal requesting fishing vessels entering the NAFO Regulatory Area to report, via the current hail system, their target species. These measures concern, in particular, the shrimp fishery. The amendment to the current hail system will not create any financial obligations for the Community nor significantly increase the financial and reporting obligations on Community fishing vessels operating in the NAFO Regulatory Area. ?

Control measures adopted by the Northwest Atlantic fisheries organisation NAFO (amend. Regul. 189/92/EEC)

By adopting the report by Mr Robin TEVERSON (ELDR, UK), the European Parliament approved this proposal for regulations with the following amendments: -Parliament considers that, if the prosperity of the fishing industry is to be ensured in the long term, fish stocks, and especially shrimp, in the NAFO area should be protected, -with a view to improving the protection of stocks, it wants the Commission to submit to it and to the Council a report assessing the current and future health of shrimp stocks in the NAFO area and the effects of the regulatory regime on the development of stocks, -it considers that technical means should be made available to prevent shrimp fishing from causing mortality among young cod, redfish and other related species particularly affected by this type of fishing. ?

Control measures adopted by the Northwest Atlantic fisheries organisation NAFO (amend. Regul. 189/92/EEC)

OBJECTIVE: introduction of new control measures applicable to Community fishing vessels following the approval by the NAFO Fisheries Commission of a binding recommendation for the Community on control measures in the NAFO Regulatory Area. COMMUNITY MEASURE: Council Regulation 1048/97/EC amending Regulation 189/92/EEC adopting provisions for the application of certain control measures adopted by the Northwest Atlantic Fisheries Organization. SUBSTANCE: the NAFO Fisheries Commission adopted on 13 September 1996 a recommendation providing for the introduction of new control measures applicable to Community vessels operating in the NAFO Regulatory Area (Northwest Atlantic Fisheries Organization). As the Community is a party to the NAFO Convention, Regulation 189/92/EEC must be amended to take account of this recommendation, which became binding on the Community on 13 November 1996. The measures concerned relate to the amendment of the 'hail system' and require fishing vessels which enter into this Regulatory Area to communicate their target species through the current 'hail system' (entry/exit messages). Regulation 189/92/EEC is therefore amended to incorporate this modification. ENTRY INTO FORCE: 19/06/1997 ?
