## Euro: exchange rate and convertibility of the CFA and the Comorian franc

---

PURPOSE : Adoption of a Recommendation for a Council Decision concerning exchange rate matters relating to the CFA franc and the Comorian franc. CONTENT : From 1 January 1999, the Community will have the exclusive competence for monetary and exchange rate matters in the Member States adopting the euro. Any agreement with third countries concerning monetary or foreign exchange rate matters needs to reflect this allocation of competence. This proposal for a draft Council Decision would allow France to maintain the present agreements that it has concerning exchange rate matters relating to the CFA franc and the Comorian franc. Such agreements are seen to have complemented the Community's development policy by enhancing regional co-operation and growth through deeper economic interdependency and solidarity.?

## Euro: exchange rate and convertibility of the CFA and the Comorian franc

---

In this report, Fernand Herman (B, EPP) will be recommending that the House approves the arrangement for pegging the CFA franc to the euro via the French franc. The CFA zone is made up of 14 West and Central African countries using the CFA franc which has been pegged to the French franc. Mr Herman notes that the principles on which the franc zone is based, and the way in which it operates, will not change in any way once the CFA franc has been pegged to the euro. The French Treasury will continue to guarantee the convertibility of the CFA franc into euros at a fixed rate and the parities and names of both currencies will remain the same. He considers that the EU has an interest in the continuation of the CFA agreement as it will protect EU-CFA trade from currency fluctuation. At the same time it will be of advantage to the associated African countries as they will belong to a large and stable monetary zone. ?

## Euro: exchange rate and convertibility of the CFA and the Comorian franc

---

The report drafted by Fernand HERMAN (B, EPP) approving proposals to peg the value of the West African CFA Franc to the Euro via the French franc was approved without debate. The report expresses the hope that France will continue to guarantee the smooth functioning of these arrangements. As this endeavour is a trial of the effect on a regional economy of linking it to a single currency of world importance, the report also calls for the on-going monitoring of the CFA countries' progress by means of economic and social indicators. The report further requests information campaigns to explain both to the citizens of the CFA countries and to the citizens of Europe the significance of this linkage. The report finally makes one modification to the Commission's recommendation, allowing France to negotiate changes to the agreement, so long as this does not affect the stability of the Euro or the ECB's commitments.?
