Final act
Regulation 2000/2039 OJ L 244 29.09.2000, p. 0026 Summary

Environment: substances depleting the ozone layer, allocation of hydrochlorofluorocarbons HCFCs, base year

PURPOSE : to present a proposal for a regulation amending Regulation on substances that deplete the ozone layer as regards the base year for the allocation of hydrochlorofluorocarbons. CONTENT : this proposal for an amendment to Regulation of the European Parliament and of the Council on substances that deplete the ozone layer is necessary because the date currently contained in this Regulation for determining the allocation of quotas of hydrochlorofluorocarbons is inappropriate and if kept could result in the Community being open to legal challenge.?

Environment: substances depleting the ozone layer, allocation of hydrochlorofluorocarbons HCFCs, base year

The committee adopted the report (under the codecision procedure, first reading) by Anneli HULTHÉN (PES, S) backing the Commission proposal modifying the rules which are to govern the allocation of quotas for producers and importers of HCFCs, to take account of the fact that 27 new importers have entered the market since 1996 (the original base year for the calculation of quotas). The committee unanimously supported the Commission's suggestion that 1999 be set as a fresh base date, which will enable more companies to obtain a share of the market.?

Environment: substances depleting the ozone layer, allocation of hydrochlorofluorocarbons HCFCs, base year

In this procedure without report, the European Parliament adopted one technical amendment to the Commission's proposal. The original proposal took 1996 as the base year for calculating the quotas. However, the market has changed considerably in the meantime with a number of new importers entering the market, who would all be deprived of a quota allocation in the future if the base date remained unchanged. The amendment suggests 1999 as the new base date, which will enable more companies to obtain a share of the market.?

Environment: substances depleting the ozone layer, allocation of hydrochlorofluorocarbons HCFCs, base year

PURPOSE : to amend Regulation 2037/2000/EC on substances that deplete the ozone layer, as regards the base year for the allocation of quotas of hydrochlorofluorocarbons. **COMMUNITY MEASURE** : Regulation 2039/2000/EC of the European Parliament and of the Council. **CONTENT** : the Council adopted two Regulations amending the Regulation adopted on 29 June 2000 relating to substances that deplete the ozone layer which implements the Montreal protocol: - the present regulation amending the base year for the allocation of hydrochlorofluorocarbons (HCFCs); - a regulation on metered dose inhalers and medical drug pumps. These amendments are intended to correct two points in the basic Regulation. The first amendment concerns the base year for allocating quotas of HCFCs for producers and importers of HCFCs. The base year provided for in the initial Regulation - 1996 - has been replaced by 1999 so that the allocation of import quotas is based on the most recent and representative figures available, in this case 1999, and so as not to result in the breach of the principles of non-discrimination and legitimate expectations, given that the market in HCFCs has changed since 1996. The Council agreed to the text as passed by the European Parliament on 21 September. The second amendment corrects the initial Regulation in order to enable the export to developing countries of health products whose use is permitted in the EU. This relates to metered dose inhalers and medical drug pumps for implantation in the human body for medical reasons. The proposed amendments do not conflict with the European Community's obligations under the Montreal Protocol. Since the Regulation of the 29 June 2000 will be applicable as of 1 October 2000 and in order to avoid legal inconsistencies, the three Regulations will be published simultaneously in the Official Journal. **ENTRY INTO FORCE** : 30.09.2000.?
