Final act

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

PURPOSE: to present a Communication from the Governments of the French Republic, the Kingdom of Sweden and the Kingdom of Belgium on the Initiative of these countries regarding the adoption by the Council of a Framework Decision on the execution in the European Union of orders freezing assets or evidence. **CONTENT:** This explanatory note seeks to explain the basis for the Initiative regarding the Framework Decision on the execution of orders freezing assets or evidence. The offences that may give rise to the freezing of assets or evidence under this Directive have been defined restrictively. At this stage of the discussions in the European Union, it was decided that it would be difficult to seek to use this instrument to abolish the conditions of double criminality and double punishability that still exist in many Member States. However, a restrictive list of offences should enable this problem to be overcome. Furthermore, the production of a certificate - at the same time as the order that is to be executed - will enable the court that orders the measures to attest, on its own responsibility, that the freezing order comes within the scope of the instrument. Execution can be refused only on formal grounds (certificate missing or incomplete). The drafters of the initiative wanted to avoid a situation where the State executing a freezing order did not know exactly what to do with the asset that was frozen. The text therefore provides not only for the execution of the freezing order but also for what will happen to the asset which has been frozen once the order has been executed. Against this background, a Framework Decision was a natural choice of instrument involving the approximation of legislation, especially procedural legislation. ?

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

PURPOSE: to present an initiative by the Governments of the French Republic, the Kingdom of Sweden and the Kingdom of Belgium for the adoption by the Council of a Framework Decision on the execution in the European Union of orders freezing assets or evidence. **CONTENT:** The main provisions of Title II on the proposed procedure for executing freezing orders relate to notification of freezing orders; grounds for non-execution; certificate; appeals and finally, liability of the issuing State. ?

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

The committee adopted the report by Luís MARINHO (PES, P) amending the proposal under the consultation procedure. It felt that mutual recognition of court orders to freeze assets or evidence should apply not only to cases of drug trafficking, fraud against the EU budget, money laundering, counterfeiting of the euro, corruption or trafficking in human beings (as specified in the text proposed by the governments of France, Sweden and Belgium) but to all cases which are punishable by a custodial sentence of at least six months. Other amendments adopted in committee included bringing forward the date of its entry into force by six months, from 31 December to 30 June 2002. The committee also advocated a pragmatic linguistic approach, arguing that, as speed was essential in the execution of freezing orders, provision could be made for Member States, if they so agreed, to accept a translation of the certificate into a widely used official EU language other than their own, which would greatly speed up proceedings.

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

The European Parliament voted 443 to 51 with 20 abstentions to approve the report by Mr Luis MARINHO (PES, P) together with non-binding amendments tabled by the committee responsible (please refer to the previous text). Moreover, the Parliament requests in particular that this framework decision applies to all freezing orders in cases where the offence which prompts the freezing order is punished, under law of the issuing State, by deprivation of liberty or a detention order for a maximum period of at least six months.?

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

On the basis of a compromise from the Spanish Presidency of the Union, the Council has taken note of a certain number of parliamentary reservations that have come to light on the contents of the framework decision on the execution in the European Union of orders freezing property or evidence. This text has been established for the purpose of the reconsultation of the European Parliament on the draft Framework Decision. To recall, the purpose of this Framework Decision is to establish the rules under which a Member State shall recognise and execute in its territory a freezing order issued by a judicial authority of another Member State. It shall not have the effect of amending the obligation to respect the fundamental rights and fundamental legal principles as enshrined in Article 6 of the Treaty on European Union. This framework decision applies to freezing orders issued for the purpose of securing evidence, or subsequent confiscation of property. With regard to the scope of the framework decision, the Presidency's compromise has been aligned on the solutions reached in the context of the Framework Decision relating to the European arrest warrant (in particular the list of 32 offences, as they are defined by the law of the issuing Member State, and if they are punishable in the issuing Member State by a custodial sentence of a maximum of at least 3 years, shall not be subject to

verification of the double criminality. It should also be added that the Council may decide to add other categories of offences to the list of 32 offences at any time, acting unanimously after consultation of the European Parliament under the conditions laid down in Article 39(1) of the TEU. The freezing orders must, in addition, be recognised and implemented in respect of the principles of legality, subsidiarity and proportionality. The Parliament shall be reconsulted on the new contents of the draft framework decision as revised by the Council.?

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

The committee adopted the report by Luis MARINHO (PES, P) broadly approving the revised initiative for a framework decision, subject to a number of amendments tabled under the consultation procedure (reconsultation). It was pleased that the new draft decision had incorporated many of the amendments tabled by Parliament in 2001 and that its scope had been enlarged to cover the same 32 types of offences listed in the European arrest warrant. Nevertheless, the committee still regarded the draft framework decision as timid and inadequate in scope, and it therefore adopted an amendment stipulating that freezing orders may be issued in the case of offences without requiring verification of double criminality, if those offences carry a maximum sentence of at least two years instead of three as stated in the proposal. It argued that otherwise many proceeds derived from offences would remain beyond the reach of the law. Other amendments were intended to ensure that all decisions relating to the freezing measures provided for in the initiative are taken exclusively by the judicial authorities of either the issuing State or the executing State and in the framework of criminal proceedings. Finally, the committee believed that the framework decision should be brought into effect as a matter of urgency, namely, by 31 December 2002. ?

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

Using its procedure without debate, the European Parliament adopted a resolution drafted by Luis MARINHO (PES, Portugal) on freezing orders. (Please refer to the document dated 14/05/02.) Parliament stated that freezing orders should be subject to adequate checks and should be issued by the competent judicial authority. ?

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

PURPOSE : to establish the rules under which a Member State shall recognise and execute in its territory a freezing order issued by a judicial authority of another Member State in the framework of criminal proceedings. COMMUNITY MEASURE : Council Framework Decision 2003/577/JHA on the execution in the EU of orders freezing property or evidence. CONTENT : This Framework Decision applies to freezing orders issued for the purposes of securing evidence or freezing property. It lists the offences that will not be subject to verification of double criminality, so long as they are punishable in the issuing State by a custodial sentence of a maximum period of at least three years. The offences include terrorism, trafficking in human beings, sexual exploitation of children, corruption and money laundering. The Council, acting unanimously, may amend this list after consulting the European Parliament. The main points of the Framework Decision are as follows: - a freezing order together with the pro forma certificate will be transmitted by the judicial authority which issued it directly to the competent judicial authority for execution. If the authority in the executing State which receives a freezing order has no jurisdiction to recognise it, the freezing order must be sent to the competent judicial authority for execution; - the certificate referred to must be translated into one of the official languages of the executing State, but a Member State may declare that it will accept a translation in a language of the EU institutions; - the competent judicial authorities of the executing State must recognise a freezing order properly transmitted without any further formality being required and must "forthwith" take the necessary measures for its immediate execution. A report on the execution of the freezing order shall be made forthwith to the competent authority in the issuing State. The competent judicial authorities of the executing State must communicate the decision on a freezing order as soon as possible and, whenever practicable, within 24 hours of receipt of the freezing order; - there is a list of specified grounds for the non-recognition or non-execution of the order, as well as specified grounds for postponement of execution of a freezing order; - the Framework Decision sets out the subsequent treatment of the frozen property. Member states must ensure that any interested party has legal remedies without suspensive effect against a freezing order, in order to preserve their legitimate interest; - the Council will assess the extent to which Member States have complied with the provisions of the Decision by 02/08/06. DATE FOR IMPLEMENTATION: 02/08/05. ENTRY INTO FORCE : 02/08/03.?

Judicial cooperation: orders freezing assets or evidence. Framework decision. Initiative France, Sweden and Belgium

This report is based on Article 14 of the Council Framework Decision 2003/577/JHA of 22 July 2003 on the execution in the European Union of orders freezing property or evidence. The main objective of this Framework Decision is to establish the rules under which a Member State shall recognise and execute in its territory an order freezing property or evidence issued by a judicial authority of another Member State in the context of criminal proceedings. It is based on the system of mutual recognition of judicial decisions in the pre-trial phase under which a freezing order is recognised without any formality, grounds for its refusal are strictly limited and the principle of dual criminality is partly abolished.

According to the Commission's report, implementation of the Council Framework Decision 2003/577/JHA of 22 July 2003 on the execution in the European Union of orders freezing property or evidence in the national legislation of the Member States of the European Union is not satisfactory. This conclusion is mainly drawn from the low number of notifications, of which some implementing laws do not even refer to the Framework Decision (provisions were adopted in view of implementation of some other international law instruments). Cyprus and the UK have covered the provisions of the Framework Decision only partly (Cyprus covered only freezing of property and the UK covered only

provisions in relation to evidence). The legislation sent by Slovenia also shows that this Member State is still using the traditional rules on mutual legal assistance as regards requests for freezing and therefore it has not implemented the principle of mutual recognition in that regard.

The 19 national legislations received by the Commission indicate numerous omissions and misinterpretations. There is still room for improvement, especially concerning direct contact between judicial authorities, grounds for refusal to recognise or execute the freezing order and also reimbursement. However, the swift execution of freezing orders seems ensured.

The Commission invites Member States to consider this report and to take the opportunity to provide all further relevant information to the Commission and to the Council Secretariat, in order to fulfil their obligations under Article 14 of the Framework Decision. In addition, the Commission encourages those Member State that have signalled that they are preparing relevant legislation, to enact and notify these national measures as soon as possible.
