Final act
Regulation 2001/1456 OJ L 194 18.07.2001, p. 0001 Summary

Conservation of fishery resources: cod stocks in the Irish Sea

PURPOSE : to amend Regulation 2549/2000/EC establishing additional technical measures for the recovery of the stock of cod in the Irish Sea (ICES Division VIIa). **CONTENT** : the conditions laid down in regulation 2549/2000/EC of 17 November 2000 establishing additional technical measures for the recovery of the stock of cod in the Irish Sea (ICES Division VIIa) are intended to ensure that the selectivity of fishing gears deployed in the Irish Sea are such that few young cod are captured. Within the conditions laid down in Regulation 2549/2000/EC it is stipulated in Article 2(1) that it is prohibited to use any demersal towed net other than beam trawl incorporating a cod-end and/or extension piece of which the thickness of the twine exceeds 6mm. However, recent scientific advice concurs with the opinion of fishermen that cod-end and/or extension piece constructed of double twine of thickness no more than 4 mm is technically equivalent to a cod-end and/or extension piece as currently defined. There is a requirement on the part of some fishermen to deploy double-twine cod-ends. Furthermore, the text of Article 3 of the current regulation refers to conditions which were relevant only during 2000 and therefore may be replaced with the text which defines the required amendment. Regulation 2549/2000/EC should, therefore, be modified accordingly. ?

Conservation of fishery resources: cod stocks in the Irish Sea

The committee adopted the report by James NICHOLSON (EPP-ED, UK) approving the proposal without amendment under the consultation procedure.?

Conservation of fishery resources: cod stocks in the Irish Sea

Conservation of fishery resources: cod stocks in the Irish Sea

PURPOSE : to amend Regulation 2549/2000/EC establishing additional technical measures for the recovery of the stock of cod in the Irish Sea. COMMUNITY MEASURE : Council Regulation 1456/2001/EC. CONTENT : This Regulation ensures that, when fishing with towed gears in the Irish Sea, certain fishermen are permitted to use a cod-end and/or extension piece of double-twined netting material of which the thickness of any individual twine does not exceed 4mm. ENTRY INTO FORCE : 19/07/2001. ?
