## Terrorism: new functions for the Schengen information System SIS II. Initiative Spain

**PURPOSE :** to present a report on the development and installation phases of SIS II up to 2006. **CONTENT :** through the intergovernmental cooperation put in place by the Schengen Convention, the Member States taking part have adopted measures removing controls on persons at internal frontiers and allowing free movement for people of any nationality, together with all the flanking measures considered necessary for lifting controls at internal frontiers. These included harmonised controls and surveillance at external borders, harmonised visa policy, various forms of police and judicial cooperation in criminal matters, and the Schengen Information System (SIS). The SIS is a joint information system that allows the competent authorities in the Member States, through an automatic query procedure, to obtain alerts regarding persons and property. Such alerts are especially useful when issuing visas, applying controls at external borders and conducting checks or other police and customs controls on home territory. The SIS, then, is a vital factor in the smooth running of the Schengen frontier-free area and indispensable

both in applying the Schengen arrangements on the movement of persons and in ensuring police and judicial cooperation in criminal matters. The current SIS was designed to be able to cope with eighteen States<sup>1</sup> but the computer technology on which it was based is now outdated. The Schengen Member States take the view that extending the SIS to further countries would compromise the operational stability of the system and might even prove technically impossible. Before the Schengen acquis was incorporated into the EU framework, they had already reached the conclusion that a second generation SIS needed to be developed. It is imperative to develop SIS II and it must be completed on time, because the future Member States cannot be accommodated within the present SIS and must therefore be integrated in SIS II in order to be able to participate in the area without internal frontiers. The development of SIS II will also allow the system to be made more powerful by using more advanced technology and adding new functions where experience in running the frontier-free area has shown they are needed. Moreover, the Belgian Presidency and Sweden put forward two initiatives which the Council will shortly be adopting, one based on the first pillar and one on the third pillar. These will give the Commission, assisted by a committee, responsibility for developing SIS II and provide a legal basis for its financing. In taking on this task, however, the Commission would emphasise that it does not bear sole responsibility for the development of SIS II. Although the Commission is responsible for budget execution, the conditions for sound execution must also be in place. In this respect, the two arms of the budgetary authority (Council and Parliament) remain responsible for entering the necessary resources in the budget. The Commission's aim in this communication is to start preparing the ground now for the tasks that it will be responsible for from 2002 and to get discussion under way on the various aspects of developing SIS II, while at the same time endeavouring to ensure consistency and continuity in line with the preliminary work begun in the Council. The communication mainly covers the development and installation phases of SIS II up to 2006. As far as operational management of SIS II is concerned, it is not possible to do any more than sketch out the options at this stage. The choice of one option rather than another depends on decisions which will have to be taken later. This communication takes stock of the situation of preparatory work under way and proposes a scenario of the action to be undertaken. At present not every detail can be determined precisely. Consequently some technical options will depend on political decisions to be taken. But the overall scenario can already be defined and work begun. A study will be carried out in 2002, in preparation for the call for tenders which the Commission will have to launch for the installation of the system. This study will also inform the Commission's preparation of a detailed proposal on the management of SIS II which will have to be presented well before 2006 so that SIS II can start up without interruption. As regards the technical development of SIS II, the Commission wishes to emphasise that it will need the support and cooperation of the Member States and Parliament in the areas that concern them and in accordance with the procedures laid down. It will be essential in order not to compromise the sound development of the technical aspects of the project for the Council to reach the necessary consensus on the political and legal questions linked to SIS II. Lastly, the Commission will see that Parliament is kept regularly informed of progress.?

## Terrorism: new functions for the Schengen information System SIS II. Initiative Spain

---

**PURPOSE :** to introduce certain new functions to the Schengen Information System, in particular in the fight against terrorism. **CONTENT :** there is a need to develop a new, second generation Schengen Information System (SIS II) with a view to the enlargement of the European Union and allowing for the introduction of new functions, while benefiting from the latest developments in the field of information technology, has been recognised and the first steps have been taken to develop this new system. The modifications to be made to this effect to the provisions of the Schengen acquis dealing with the Schengen Information System consist of two parts: this Decision based on Articles 30, 31 and 34 of the Treaty on European Union and a Council Regulation (CNS/2002/0812). The reason for this is that, as set out in Article 93 of the 1990 Schengen Convention, the purpose of the Schengen Information System is to maintain public policy and public security, including national security, in the territories of the Member States and to apply the provisions of the said Convention relating to the movement of persons in those territories, by using information communicated via the SIS in accordance with the provisions of that Convention. Since some of the provisions of the 1990 Schengen Convention are to be applied for both purposes at the same time, it is appropriate to modify such provisions in identical terms through parallel acts based on each of the Treaties. The draft Decision stipulates that the provisions of the 1990 Schengen Convention shall be amended in order: - to provide for the possibility to add certain information concerning persons introduced in the SIS pursuant to Articles 95 and 99, notably to enhance the security of the officers checking the person; - to extend the categories of objects that can be entered in the SIS for purposes of discreet surveillance or specific checks to include ships, aircrafts and containers for example when these are used for drug or human trafficking; to simplify the procedure for introducing alerts pursuant to Article 99(3) by changing the prior consultation to merely an exchange of information; - to extend the categories of objects that can be entered in the SIS for the purpose of seizure or use as evidence in criminal proceedings to include ships, aircrafts, containers, certain issued official documents and number plates and credit documents; - to clarify and specify the possibility for Member States to allow public prosecutors and magistrates access to the SIS; - to allow Europol and the national members of of Eurojust to have access to certain SIS data, subject to certain conditions, notably that the adequate data protection rules be complied with; - to oblige Member States to record every transmission of personal data (instead of only every tenth transmission as currently required) and to extend the deadline for keeping these records to maximum one year; - to provide a common legal basis for the existence and functioning of the SIRENE bureaux; - to complete Article 113 of the Schengen Convention on the maximum storage time of alerts in view of the proposals of the present initiative for the new categories of data; - to set up rules for the archiving of SIRENE files. Lastly, both the United Kingdom and Ireland will take part in the Council Decision but will not be bound by the Regulation. As regards Iceland and Norway, this Decision constitutes a development of provisions of the Schengen acquis and therefore this Decision shall be applicable to them.?

## Terrorism: new functions for the Schengen information System SIS II. Initiative Spain

---

The European Parliament adopted, by 377 votes for, 89 votes against and 49 abstentions, a resolution drafted by Carlos COELHO (EPP-ED, Portugal) and made some amendments to the Spanish initiative. (Please refer to the document dated 03/12/02.)?

## Terrorism: new functions for the Schengen information System SIS II. Initiative Spain

---

**PURPOSE:** the introduction of some new functions for the Schengen Information System, including in the fight against terrorism

**LEGISLATIVE ACT:** Council Decision 2005/211/JHA.

**PURPOSE:** The 1990 Schengen Convention is amended in order to further facilitate the fight against crime, including terrorism.

This Decision authorises access to the Schengen Information System (SIS) for Europol and Eurojust. It also provides for the introduction of new functions, including the following:

- the addition of extra data (concerning, for example, vehicles, means of payment, etc.),
- less cumbersome procedures for exchanging information between competent authorities,
- technical improvements.

The Decision also aims to facilitate more effective control over personal data protection. The purpose of the Schengen Information System is to maintain public policy and public security, including national security, in the territories of the Member States and to apply the provisions of the 1990 Schengen Convention relating to the movement of persons in those territories. It is one of the instruments used to compensate for the abolition of controls within the internal borders of the Schengen area.

ACT : Council Decision 2006/229/JHA fixing the date of application of certain provisions of Decision 2005/211/JHA concerning the introduction of some new functions for the Schengen Information System, including in the fight against terrorism.

CONTENT : Council Decision 2005/211/JHA concerning the introduction of some new functions for the Schengen Information System, specifies that the provisions of Article 1 of that Decision shall apply from a date fixed by the Council, as soon as the necessary preconditions have been fulfilled. Article 1(7) of Decision 2005/211/JHA relates to the following:

- motor vehicles with a cylinder capacity exceeding 50 cc, boats and aircraft which have been stolen, misappropriated or lost;
- trailers with an unladen weight exceeding 750 kg, caravans, industrial equipment, outboard engines and containers which have been stolen, misappropriated or lost;
- firearms which have been stolen, misappropriated or lost;
- blank official documents which have been stolen, misappropriated or lost;
- issued identity papers such as passports, identity cards, driving licences, residence permits and travel documents which have been stolen, misappropriated, lost or invalidated;
- vehicle registration certificates and vehicle number plates which have been stolen, misappropriated, lost or invalidated;
- banknotes (registered notes);
- securities and means of payment such as cheques, credit cards, bonds, stocks and shares which have been stolen, misappropriated or lost.

The preconditions have been fulfilled and Article 1(7) of Decision 2005/211/JHA, new Article 100(3)(e), relating to issued identity papers such as passports, identity cards, driving licences, residence permits and travel documents which have been stolen, misappropriated, lost or invalidated shall apply from 31 March 2006.

DATE OF EFFECT : 09/03/2006.

- banknotes (registered notes);
- securities and means of payment such as cheques, credit cards, bonds, stocks and shares which have been stolen, misappropriated or lost.

The preconditions have been fulfilled and Article 1(7) of Decision 2005/211/JHA, new Article 100(3)(f), relating to vehicle registration certificates and vehicle number plates which have been stolen, misappropriated, lost or invalidated shall apply from 31 March 2006.

DATE OF EFFECT : 09/03/2006.

## Terrorism: new functions for the Schengen information System SIS II. Initiative Spain

---

ACT : Council Decision 2006/631/JHA fixing the date of application of certain provisions of Decision 2005/211/JHA concerning the introduction of some new functions for the Schengen Information System, including in the fight against terrorism.

CONTENT : Article 2(4) of Decision 2005/211/JHA specifies that certain provisions of Article 1 of that Decision shall take effect from a date to be fixed by the Council, as soon as the necessary preconditions have been fulfilled, and that the Council may decide to fix different dates concerning the taking effect of those provisions. The preconditions have been fulfilled in respect of Article 1(9) (new Articles 101A and 101B) of Decision 2005/211/JHA and the Council has decided that the Decision shall apply from 1 October 2006.

This Decision shall apply to Switzerland as it constitutes a development of the provisions of the Schengen acquis to which this country is associated.

ENTRY INTO FORCE : 24/07/2006.
