Final act

[Regulation 2003/1954](#)
[OJ L 289 07.11.2003, p. 0001-0007](#) Summary

Fisheries management: areas and resources of Atlantic waters, 1986 enlargement (amend. Regulation (EEC) No 2847/93)

PURPOSE : to present the proposal for a Council Regulation on the management of the fishing effort relating to certain Community fishing areas and resources and modifying Regulation 2847/93/EEC. **CONTENT** : this proposal for a Council Regulation puts in place a new regime for fishing effort in Atlantic Waters, replacing the existing system, which was set out under Regulation 685/95/EC on the management of the fishing effort relating to certain Community fishing areas and resources, and of Regulation 2027/95/EC implementing a system of fishing effort management concerning certain Community fishing areas and resources. This regime should be now revised in the light of changes in the legal framework. The Commission is concerned that this legal uncertainty should not lead to problems between Member States or fishermen at sea. It is therefore necessary that the legislator acts as soon as possible to remove any discrimination on nationality between Member States still contained in the regulations, while maintaining efficient management of resources in the areas concerned. In the meantime Member States should act responsibly and co-operate in order to ensure the maintenance of conservation measures and the avoidance of disputes about fishing rights in the areas concerned. The new fishing effort regime proposed for the Atlantic waters takes account of these evolutions and is aimed at guaranteeing the stability of fishing effort levels in the Atlantic waters, on the basis of deployed fishing effort over a recent period by the vessels of all Member States. To achieve this objective the present proposal foresees the following: - the establishment of lists of fishing vessels authorised to exercise their fishing activities in the fisheries; - the evaluation and the setting of maximum fishing effort ceilings for demersal fisheries; - measures concerning the capture of pelagic species; - the establishment of conditions to exercise certain fishing activities; - the adaptation of the Fishing Effort Control Regime.?

Fisheries management: areas and resources of Atlantic waters, 1986 enlargement (amend. Regulation (EEC) No 2847/93)

The committee adopted the report tabling several amendments to the proposal under the consultation procedure. These were aimed at removing pelagic stocks from the scope of the proposal, on the grounds that they are migratory and therefore move in and out of Western waters. The committee argued that effort limitations were not therefore appropriate. The report will be presented in plenary by committee chairman Struan STEVENSON (EPP-ED, UK) as the original rapporteur, Seán Ó NEACHTAIN (UEN, IRL), resigned as rapporteur after his proposed amendments aimed at maintaining the area known as the "Irish Box" as a separate sub-zone with specific effort allocations (on the grounds that it contains spawning and nursery grounds of special sensitivity) were narrowly rejected by the committee. ?

Fisheries management: areas and resources of Atlantic waters, 1986 enlargement (amend. Regulation (EEC) No 2847/93)

The European Parliament adopted a resolution making one amendment to the Commission's proposal. The rapporteur was Struan STEVENSON (EPP-ED, UK). The amendment stated that the Regulation recognised the vital importance of conservation zones in the development of a sustainable fisheries policy and accepts the key position of the Irish Box as one of the Union's most sensitive nursery and spawning grounds. Therefore Regulations 2847/93/EC and 685/95/EC will be maintained for a period of ten years. At the end of this period ICES and STECF will carry out a review to establish whether the policy of restricted access has assisted in meeting the objectives of the cod recovery plan in rebuilding endangered whitefish stocks.?

Fisheries management: areas and resources of Atlantic waters, 1986 enlargement (amend. Regulation (EEC) No 2847/93)

PURPOSE : to introduce a new revised effort limitation scheme in Western Waters and to amend Regulation 2847/93/EC. LEGISLATIVE ACT : Council Regulation 1954/2003/EC on the management of the fishing effort relating to certain Community fishing areas and resources and modifying Regulation 2847/93/EC and repealing Regulations 685/95/EC and 2027/95/EC. CONTENT : the Council adopted by qualified majority, with Ireland and Spain voting against and Belgium abstaining, this Regulation on the management of the fishing effort relating to certain Community fishing areas and resources and modifying Regulation 2847/93/EC ("Western Waters"). This Regulation shall introduce a revised effort limitation scheme in Western Waters following the reform of the Common Fisheries Policy (CFP) and the full integration of Spain and Portugal into the CFP. The main elements of the political agreement are as follows: - establishment of a biologically sensitive area to replace the current "Irish Box" (which stretches 50 miles around the Irish coast); - establishment of a reference period (1998-2002) for drawing up the list of vessels authorised to fish; - establishment of a 100-mile protection zone for the outermost regions; - establishment of a kilowatt-day system to calculate the fleet's fishing effort; - establishment of a minimum size for vessels covered by the Regulation depending on the area (10 metres for biologically sensitive areas, 15 metres for other areas). ENTRY INTO FORCE : 14/11/2003.?
