Regulation 2002/2372 OJ L 358 31.12.2002, p. 0081-0083 Summary

Oil pollution: measures to compensate the Spanish fisheries and aquaculture after the Prestige shipwreck

The European Parliament approved the proposal on compensation for Spanish fisheries, shellfish industry and aquaculture affected by oil spills from the Prestige.?

Oil pollution: measures to compensate the Spanish fisheries and aquaculture after the Prestige shipwreck

PURPOSE : to institute specific measures to compensate the Spanish fisheries, shellfish industry and aquaculture, affected by the oil spills from the Prestige. **CONTENT** : the Commission presented a proposal for specific measures to compensate operators in the Spanish fisheries, shellfish and aquaculture sector hit by the oil spill from the sinking of the oil tanker "Prestige" off the coast of Galicia on 22 November 2002 . The Commission proposes the adaptation of a December 2001 Council Regulation allocating aid to encourage the reconverting of the fleets which used to operate in Morocco's waters in order to allow the financial transfer of budgetary resources to repairing the damages caused by the oil spill. Thus, some EUR 30 Million would become available for this purpose. In addition, a number of provisions of the 2000-2006 FIG programme would be subject to derogation as they have not been designed to cope with environmental damage of such magnitude. Under current FIG rules, compensation for temporary cessation of activities can only be paid to fishermen and vessel owners. In order to ensure equal treatment to the fish and shellfish farming sectors, the Commission proposes to extend compensation for temporary cessation of activities to these sectors. In addition aid would be made available for shellfish restocking, cleaning, repairing and rebuilding aquaculture sites and replacing damaged fishing gear. Currently, there is a limit of 4% on the global FIG allocation of each Member State that can be dedicated to compensating temporary cessation of activities due to unforeseen circumstances. In addition, indemnities cannot be paid for more than 2 months per year. The Commission proposes, therefore, that these restrictions be lifted so as to compensate Spanish fishermen, vessel owners, shellfish and fish farmers who have been forced to halt their activities.?

Oil pollution: measures to compensate the Spanish fisheries and aquaculture after the Prestige shipwreck

PURPOSE : to institute specific measures to compensate the Spanish fisheries, shellfish industry and aquaculture affected by the oil spills from the Prestige. **COMMUNITY MEASURE** : Council Regulation 2372/2002/EC. **CONTENT** : the Council unanimously adopted the Regulation instituting specific measures to compensate Spanish Fisheries, shellfish industry and aquaculture, affected by the oil spills from

Prestige. The aims of the proposal are to help compensating the damages by a contribution from the Community. A financial assistance is foreseen through the reallocation of funds including reprogramming of the Spanish share (around EUR 80 million) of the Financial Instrument for Fisheries Guidance (FIFG). Part of the budgetary resources (around EUR 30 million) for the conversion of the Spanish vessels that were up to 1999 dependent on the fishing agreement with Morocco will also be used for the reparation of the damages in question. ENTRY INTO FORCE : 01/01/2003.?
