Digital short-range radio (DSRR)

This proposed Directive calls for common frequency bands for DSRR throughout the Community. It is based on the work of CEPT which has recommended the 888-890 band in association with 933-935 MHz for DSRR. The objective of the Directive is to ensure the availability of sufficient frequency resources in order to implement the system at the earliest possible date.?

Digital short-range radio (DSRR)
