### Final act

[Regulation 1994/3381](#)  
[OJ L 367 31.12.1994, p. 0001](#) Summary

## Dual-use goods and technologies, nuclear products and technologies: control of exports

This proposal for a regulation aimed to ensure that all of the Member States implemented, on the basis of common standards, effective controls of exports to non-Community countries of certain goods and technologies that could be used for both civil and military purposes. The proposal stipulated in particular: - that the competent authorities should issue an individual export authorisation in accordance with certain criteria (respect for international commitments, the situation in the country of final destination, etc.); - that the Member States should establish direct cooperation and exchange information among the competent authorities; - that all exports or re-exports should have documentation that identified the description of the goods, their quantity and weight, and the name and address of the exporter and the consignee. ?

## Dual-use goods and technologies, nuclear products and technologies: control of exports

The Committee on Economic and Monetary Affairs adopted the report by Mr Gérard FUCHS, which called inter alia for: - a change in the title of the directive to incorporate the free internal movement of these products; - Member States to adapt their national lists of military goods once agreement was reached on a list of dual-use goods, with no products appearing on two lists at the same time; - inclusion in the regulation of a final destination clause; - a committee, composed of experts from the Member States and a representative of the Commission, which should be responsible for direct cooperation and exchanges of information; - possible sanctions to apply not only to companies but also to managers within companies in cases of infringement of the regulation. ?

## Dual-use goods and technologies, nuclear products and technologies: control of exports

---

Parliament adopted the report of Mr Gérard Fuchs (PSE, F) on a regulation concerning export controls for certain dual-use goods and technologies and certain nuclear products and technologies. ?

## Dual-use goods and technologies, nuclear products and technologies: control of exports

---

1) OBJECTIVE To set up a Community regime for the control of exports of dual-use goods on the basis of rules common to all the Member States. 2) SUBSTANCE 1. This regulation establishes a Community regime for the control of exports of dual-use goods. 2. Dual-use goods shall mean goods which can be used for both civil and military purposes. 3. An authorisation shall be required for the export of the dual-use goods listed in Annex I to Council Decision 94/942/CFSP of 19 December 1994 concerning the control of exports of dual-use goods. This authorisation is valid throughout the Community. 4. An export authorisation shall be required for the export of dual-use goods not listed in Annex I to Council Decision 94/942/CFSP, if the exporter has been informed by his authorities that the goods in question are or may be intended, in their entirety or in part, for one of the following: \* the development, production, handling, operation, maintenance, storage, detection, identification or dissemination of chemical, biological or nuclear weapons; \* the development, production, maintenance or storage of missiles capable of delivering such weapons, as covered by the corresponding non-proliferation arrangements. 5. An export authorisation is specific. It is granted by the competent authorities of the Member State in which the exporter is established. However, Member States may apply simplified authorisation procedures or require authorisations to be subject to certain requirements. 6. Where an export authorisation is refused, annulled, suspended, substantially limited or revoked by a Member State, it shall inform the other Member States. 7. Member States may limit the number of customs offices responsible for customs formalities for exports. The list of competent customs offices is published for information purposes in the "C" series of the Official Journal of the European Communities. This regulation adopts the customs formalities to be met by exporters. 8. Exporters must provide the competent authorities with all the information required concerning their export request or their activities. 9. Member States may prohibit or make subject to export authorisation goods not listed in Annex I to Decision 94/942/CFSP. In this case, that Member State must notify the Commission and the other Member States of the measures it has taken. 10. Direct cooperation is established between the competent authorities of the Member States for the application of this regulation. 11. Specific provisions concerning intra-Community transfers of: \* separated plutonium; \* uranium enriched to more than 20%; \* installations, main components of crucial importance and technology related to reprocessing, to enrichment and to the production of heavy water. 12. A coordinating group chaired by a representative of the Commission and composed of representatives from each Member State shall be set up. The regulation shall enter into force on 31 December 1994 and apply from 1 March 1995. Source: European Commission - Info92 - 10/95 ?
