Final act

[Directive 2009/47](#)

Value added tax (VAT): reduced rates

PURPOSE: to amend Directive 2006/112/EC as regards reduced rates of value added tax with particular reference to locally supplied services including labour-intensive services and restaurant services.

PROPOSED ACT: Council Directive.

BACKGROUND: the Commission adopted a Communication on VAT rates other than standard VAT rates ("the 2007 Communication"), which explores ways forward in the field of reduced VAT rates, as the starting point of a broad political debate in the other EU Institutions and with all stakeholders (see [CNS/2007/0136](#)). In parallel, the Commission tables a limited legislative proposal amending the provisions of Directive 2006/112/EC ("the VAT Directive") relating to urgent issues, which do not require any substantial additional study other than that referred to in its Communication and detailed in the Commission staff working document. This proposal should be regarded as a first action concerning reduced VAT rates. The exercise involves changes to Title VIII (Rates) of the VAT Directive.

The Commission's objective is to ensure equal opportunities for Member States as well as more transparency, consistency and a smooth functioning of the internal market as regards reduced VAT rates for locally supplied services including labour-intensive services and restaurant services.

Whilst an in depth review of the whole structure of VAT reduced rates will be carried out, the Commission considers it is important to tackle the most urgent issues. These are legal and political problems which have arisen either because of divergent interpretations of the directive or because of a lack of a level playing field for all Member States as regards the possibility of applying reduced rates in those areas where the proper functioning of the internal market is not affected. In particular, the Commission considers that there is room to grant more autonomy to Member States in setting reduced rates for certain local services in line with the efforts to improve the business environment for SMEs which is one of the priority action areas under the Lisbon strategy for growth and jobs, and in particular the Small Business Act (see [COM\(2008\)0394](#)).

CONTENT: this proposal essentially covers the main temporary provisions expiring at the end of 2010 concerning local services. It thus proposes permanent, updated provisions on the labour-intensive services listed in Annex IV of the VAT Directive which expire on 31 December 2010. It also proposes the addition of certain other locally supplied services, including restaurant services, to the current Annex III of the VAT Directive (list of the goods and services eligible for a reduced rate). The technical adaptations included in this proposal concern either legal drafting improvements, clarifications, updating to take account of technical progress or removal of current inconsistencies.

Accordingly, the Commission proposes to provide Member States with the flexibility to apply reduced VAT rates for some specific services on a permanent basis. The Commission proposal covers areas where there is sufficient evidence that reduced rates do not create problems for the proper functioning of the Internal Market. The sectors concerned are mainly so called labour-intensive services and locally supplied services, including restaurant services, and the main points include the following:

- the housing sector will no longer be limited to services linked to a social policy, as it is currently, but will be broadened to include the supply and construction of all housing, as well as all services related to the housing sector (including renovation, maintenance, cleaning.)

the supply of restaurants and catering services, excluding alcoholic beverages are included;

- labour-intensive services will be permanently included in the list of services eligible for reduced rates. Moreover, the category is broadened to other locally supplied services of a similar nature. That is: minor repair of tangible movable goods, including bikes but excluding other means of transport (examples include shoes, clothes, computers, watches); cleaning and maintenance services of all these goods and, in this case, other means of transports are included; domestic care services (e.g. home help and care of the young, elderly, sick or disabled); all personal care services (including hairdressing, beauty services); gardening services; renovation and maintenance services provided to places of worship, cultural heritage and historical monuments, as recognised by Member States.

In addition a number of small clarifications are proposed. The category of pharmaceutical products is widened to cover all absorbent hygiene products, notably including children's nappies. Concerning medical equipment for the disabled, the Commission proposes widening this category to cover all specially designed or adapted material or equipment for the exclusive personal use of the disabled (including specially adapted cars, Braille keyboards).

Printed books, under current legislation, may be subject to reduced rates. The Commission proposes widening the definition of books to include audio-books. These are defined as 'CDs, CD-ROMs or any physical support that predominantly reproduce the same information content as printed books' and which do not include other material such as games.

Value added tax (VAT): reduced rates

The Council took note of the presentation by the Commission of three working documents on reduced rates of VAT, following on from a ministerial discussion at an informal meeting in Nice on 13 September 2008. It held an exchange of views, on that basis, on the economic and budgetary impact of reduced VAT rates, their advantages and disadvantages, and on whether they were an appropriate instrument for achieving sectoral policy objectives.

Last December, the Council agreed to conduct a policy debate on the impact and usefulness of reduced rates. In July 2008 the Commission submitted an initial proposal (see the summary dated 7 July 2008), which will be examined by the Council at its November meeting.

Value added tax (VAT): reduced rates

The Council examined a proposal for a Directive amending the rules on reduced rates of VAT (value added tax), pending an in-depth review of

the rules. It requested the Permanent Representatives Committee (Coreper) to continue to examine the outstanding issues, to enable the Council to take a decision by the end of the year.

The proposal is intended to allow Member States to apply reduced rates ? indefinitely ? to certain locally-provided services, including catering services, for which there is no risk of unfair competition in the internal market.

Value added tax (VAT): reduced rates

The Council examined a draft Directive revising the rules on reduced rates of VAT (value-added tax).

The Presidency noted that there was no unanimous agreement on the proposed compromise at this stage. It pointed out that the proposed Directive was an element in the responses to the economic slowdown identified in the Commission communication to the European Council and would therefore be one of the measures raised at the next European Council.

In December 2007, the Council agreed that in 2008 it would conduct a policy debate on the impact and usefulness of reduced rates. The Commission submitted an initial proposal for a Directive in July 2008. In addition, the Commission is currently preparing a communication on the application of reduced VAT rates to environmental goods and services.

Value added tax (VAT): reduced rates

The Council discussed the issue of reduced rates of value-added tax (VAT), in the context of the economic recovery plan approved by the European Council in December.

The presidency indicated that it will reflect on how to take the dossier forward in response to the European Council's request to settle the issue by March 2009. A further discussion is expected at the Council's meeting on 10 March, in the run-up to the next European Council, on 19 and 20 March.

Value added tax (VAT): reduced rates

The Committee on Economic and Monetary Affairs adopted the report by Ieke van den Burg (PES, NL), approving the proposal for a Council directive amending Directive 2006/112/EC as regards reduced rates of value added tax, with a series of amendments proposed by the Committee on the Internal Market and Consumer Protection, which was asked for an opinion.

These amendments highlight the fact that reduced VAT rates would have a positive impact in reshaping many service sectors as they would reduce the level of undeclared work. In this context, Member States should provide clear and accessible guidance to undertakings on the scope of reduced VAT rates.

With regard to the housing sector, the amendments stress that the Directive also makes it possible for Member States to apply reduced VAT rates to renovation and repair work aimed at increased energy savings and efficiency.

Value added tax (VAT): reduced rates

The European Parliament adopted, by 636 to 14 with 18 abstentions,

a legislative resolution amending the proposal for a Council directive amending Directive 2006/112/EC as regards reduced rates of value added tax.

The amendments ? made in the framework of the consultation procedure - highlight the fact that reduced VAT rates would have a positive impact in reshaping many service sectors as they would reduce the level of undeclared work. In this context, Member States should provide clear and accessible guidance to undertakings on the scope of reduced VAT rates.

With regard to the housing sector, an amendment stresses that the Directive also makes it possible for Member States to apply reduced VAT rates to renovation and repair work aimed at increased energy savings and efficiency.

The following points are added to the Annex as eligible for reduced rates:

- supplies of goods and services of a kind normally intended for use in agricultural production, including machinery, with the exception of capital goods, such as buildings;
- children's clothing, children's footwear.

Value added tax (VAT): reduced rates

PURPOSE: to amend Directive 2006/112/EC as regards reduced rates of value added tax with particular reference to locally supplied services including labour-intensive services and restaurant services.

LEGISLATIVE ACT: Council Directive 2009/47/EC amending Directive 2006/112/EC as regards reduced rates of value added tax.

CONTENT: the Council adopted a directive allowing ? on a permanent basis ? the optional use of reduced rates of value-added tax (VAT) for certain labour-intensive local services, including restaurant services, for which there is no risk of unfair competition between service providers

in different Member States.

Adoption of the Directive follows political agreement reached at the Council's meeting on 10 March.

The optional use of reduced VAT rates in certain sectors is one of the actions identified by the [economic recovery plan](#) approved by the European Council in December. EU rules on VAT rates, set by Directive 2006/112/EC, require Member States to apply a minimum 15 % standard rate to most goods and services. Member States are, however, allowed to apply one or two reduced VAT rates to a limited number of supplies. Where a reduced rate is allowed, this must amount to at least 5 % of the value of the supply. The current rules are the outcome of a variety of initiatives over the years, including the 1992 decision on the harmonisation of VAT rates in the context of the EU single market, a 2000 decision to allow reduced VAT rates on labour-intensive local services with a view to stimulating employment, and derogations allowed in 2004 for newly acceding Member States.

Reduced rates on labour-intensive local services have so far only been allowed on a temporary basis.

Under this Directive Member States that so wish may apply reduced VAT rates, on a permanent basis, to:

1) the following labour-intensive local services:

- minor repairs of bicycles, shoes and leather goods, clothing and household linen (including mending and alteration);
- window cleaning and cleaning in private households;
- domestic care services such as home help and care of the young, elderly, sick or disabled;
- hairdressing;
- the renovation and repair of private dwellings, excluding materials which account for a significant part of the value of the service supplied;

2) restaurant and catering services;

3) books, on all physical means of support (including brochures, leaflets and similar printed matter, children's picture, drawing or colouring books, music printed or in manuscript form, maps and hydrographic or similar charts), newspapers and periodicals, other than material wholly or predominantly devoted to advertising).

In addition, Portugal may apply a reduced VAT rate to tolls on bridges in the Lisbon area, Cyprus is allowed to apply a reduced VAT rate to the supply of liquid petroleum gas in cylinders, and Malta may maintain a zero VAT rate for the supply of foodstuffs and pharmaceuticals.

ENTRY INTO FORCE: 01/06/2009.
