## Protection against counterfeiting: medals and tokens similar to euro coins

**PURPOSE:** to amend Regulation (EC) No 2182/2004 concerning medals and tokens similar to euro coins.

**PROPOSED ACT:** Council Regulation.

**CONTENT:** Council Regulation 2182/2004 aims to protect euro coins against medals and tokens which are similar to euro coins. Since its adoption, the Regulation has significantly contributed to avoiding similarity between euro coins and medals/tokens, as private companies now generally comply with the definitions and the prohibitions established in the Regulation.

Experience gained during the implementation period has highlighted the need to clarify the protective provisions and to increase transparency in the decision making process; it is therefore necessary to modify the Regulation.

In particular, the public may be led to believe that some medals or tokens have legal tender status not only when they bear a design similar to the ones on legal tender euro coins but also when they bear distinctive parts of these designs. Such parts are notably the twelve stars of the European Union, the geographical representations and the numerals, the shapes of the edge and the edge design in the way they appear on legal tender euro coins.

The Commission proposes to define, particularly for the benefit of private operators producing medals and tokens, the specific signs which should not be reproduced on medals and tokens in the way they are depicted on legal tender euro coins. These are symbols representative of the issuing Member State's sovereignty, such as the effigies of the Head of State, the coat of arms, the Mint marks, the Mint master marks, the name and the image of the geographical representation of the country, in the specific way they appear on euro coins.

Since these protected elements are part of either the common or the national faces of euro coins, it is no longer meaningful to maintain the distinction between the two. Furthermore, in a number of cases, more extensive common elements have been included on the national sides

of euro coins, such as the Treaty of Rome design or the ten years of EMU. The protective measures should therefore refer to any design appearing on the surface of medals or tokens similar to any design on legal tender euro coins.

The Regulation currently states that the Commission is competent to declare whether a design is similar to the one appearing on euro coins. The Commission's opinion should be based on the entire range of the protective provisions included in Article 2, including the interpretation of whether a metallic object should be considered as a medal/token within the meaning of the definition in Article 1(c).

The criteria on the basis of which the Commission delivers an opinion on similarity or compliance to the other provisions of the Regulation need also to be further clarified. Concretely the Commission's decision should also take into account the quantities of medals or tokens produced, the selling price, packaging, the specific inscriptions on the medals and tokens (such as the company name, the indication 'no legal tender?...'), as well as the relevant advertisement. Since it has been necessary to take into consideration such criteria in practice, these criteria should be explicitly stated in the Regulation.

In declaring similarity and in considering compliance with the provision of the Regulation, the Commission has been working closely with experts from Member States, namely the counterfeit coin experts referred to under Article 4 paragraph 1 of Commission Decision of 29 October 2004 establishing the European Technical and Scientific Centre considering their expertise in visual and material analysis of coins. This consultation should continue.

Article 4 refers to derogations by authorisation, including the Commission's responsibility to declare similarity. Considering that the latter responsibility relates to the respect of the protective provisions, it is appropriate, for the sake of clarity, to transfer this under the same Article.

Economic operators may use the terms 'euro' or 'euro cent' or the euro symbol on medals and tokens under restricted conditions, inter alia, if the indication 'Not legal tender' is stamped on the obverse or the reverse of the medal or token. Considering that the risk of confusion with euro coins is greater where the medal or token bears a nominal value, the requirement related to the indication 'Not legal tender' should be limited to this circumstance.

More specifically, it is proposed to amend:

- Article 2 of Regulation 2182/2004, to clarify the protective provisions;
- Article 4 of Regulation 2182/2004, to include assessment criteria and modify the decision making procedure to be moved to Article 2;

The proposal includes a parallel Regulation modifying Regulation 2183/2004, intended to extend the effects of the modification to Member States not participating in the euro (see [CNS/2008/0168](#)).

## Protection against counterfeiting: medals and tokens similar to euro coins

---

The Committee on Economic and Monetary Affairs unanimously adopted a report drafted by Eoin RYAN (UEN, IE) and approved, without amendment, following the consultation procedure, the proposal for a Council regulation amending Regulation (EC) No 2182/2004 concerning medals and tokens similar to euro coins.

## Protection against counterfeiting: medals and tokens similar to euro coins

---

The European Parliament adopted, by 550 votes to 9 with 41 abstentions and adopted a legislative resolution under the consultation procedure approving the proposal for a Council regulation amending Regulation (EC) No 2182/2004 concerning medals and tokens similar to euro coins.

The report had been tabled for consideration in plenary by Eoin RYAN (UEN, IE) on behalf of the Committee Economic and Monetary Affairs.

## Protection against counterfeiting: medals and tokens similar to euro coins

---

**PURPOSE:** to amend Regulation (EC) No 2182/2004 concerning medals and tokens similar to euro coins.

**LEGISLATIVE ACT:** Council Regulation (EC) No 46/2009 amending Regulation (EC) No 2182/2004 concerning medals and tokens similar to euro coins.

**CONTENT:** [Council Regulation \(EC\) No 2182/2004](#) prohibits those medals and tokens similar to euro coins. Experience gained implementing the prohibition of medals and tokens similar to euro coins has highlighted the need to clarify the protective provisions and to make the decision-making process more transparent.

It is for this reason that the Council has adopted an amending Regulation. The main issues can be summarised as follows:

Amendments to protective provisions: given that the public may be led to believe that some medals and tokens have legal tender status, not only when they bear a design similar to euro coins but also when they bear certain elements of the designs on euro coins, the amending Regulation stipulates that the production and sale of medals and tokens, and their importation and distribution for sale or for other commercial purposes, shall be prohibited in the following circumstances: (a) when the terms 'euro' or 'euro cent' or the euro symbol appear on their surface; (b) when their size is inside the reference band; or (c) when a design appearing on their surface is similar to: (i) any design, or parts thereof, appearing on the surface of euro coins, including in particular the terms 'euro' or 'euro cent?', the 12 stars of the European Union, the image of the geographical representation and the numerals, in the way depicted on euro coins; or (ii) those symbols representative of national sovereignty of Member States, as depicted on euro coins, including in particular the effigies of the Head of State, the coat of Arms, the Mint marks, the Mint master marks, the name of the Member State; (iii) the edge shape or the edge design of euro coins; or (iv) the euro symbol.

Comitology amendments: the Commission is competent to declare whether a design is similar to the one appearing on euro coins. The Commission's opinion should be based on the entire range of the protective provisions, including the interpretation of whether a metallic

object should be considered as a medal/token within the meaning of the definition set out in the Regulation. The Commission, after having consulted the counterfeit coin experts referred to in Commission Decision 2005/37/EC of 29 October 2004 establishing the European Technical and Scientific Centre (ETSC) and providing for coordination of technical actions to protect euro coins against counterfeiting, should specify whether the protective provisions referred to in Regulation (EC) No 2182/2004 have been respected and whether a metallic object is a medal/token.

Derogations by authorisation: the Regulation stipulates that the Commission may grant specific authorisations to use the terms 'euro' or 'euro cent' or the euro symbol on the surface of medals and tokens, under controlled conditions of use, in cases where no risk of confusion exists. In such cases, the economic operator concerned within a Member State shall be clearly identifiable on the surface of the medal or token and, when the medal or token bears an associated nominal value, the indication 'Not legal tender' must be stamped on the obverse or the reverse of the medal or token.

The Regulation also states that medals and tokens bearing the terms 'euro' or 'euro cent' or the euro symbol without an associated nominal value shall not be prohibited when their size is outside the reference band, unless a design similar to one of the elements referred to in the Regulation (the effigies of the Head of State, the coat of arms, etc) appears on their surface.

ENTRY INTO FORCE: 11.02.2009.
