Final act

[Regulation 2010/1094](#)
[OJ L 331 15.12.2010, p. 0048](#) Summary

Final legislative act with provisions for delegated acts

European Insurance and Occupational Pensions Authority (EIOPA): establishment

PURPOSE: to establish a European Insurance and Occupational Pensions Authority.

PROPOSED ACT: Regulation of the European Parliament and of the Council.

BACKGROUND: experience of the financial crisis has exposed important failures in financial supervision, both in particular cases and in relation to the financial system as a whole. Building on the recommendations presented in February 2009 of a group of high level experts, chaired by Mr Jacques de Larosière, the Commission set out proposals for a new European financial supervisory architecture in its Communication to the Spring European Council of March 2009 ([COM\(2009\)0114](#)). The Commission presented its ideas in more detail in its Communication of May 2009 ([COM\(2009\)0252](#)) which proposed the establishment of :

- a European System of Financial Supervisors (ESFS), consisting of a network of national financial supervisors working in tandem with new European Supervisory Authorities (ESAs), created by transforming the existing European supervisory committees into a European Banking Authority (EBA), a European Insurance and Occupational Pensions Authority (EIOPA), and a European Securities

- and Markets Authority (ESMA), thereby combining the advantages of an overarching European framework for financial supervision with the expertise of local micro-prudential supervisory bodies that are closest to the institutions operating in their jurisdictions; and
- a European Systemic Risk Board (ESRB), to monitor potential threats to financial stability that arise from macro-economic developments and from developments within the financial system as a whole. To this end, the ESRB would provide an early warning of system-wide risks that may be building up and, where necessary, issue recommendations for action to deal with these risks.

The European Council, in its conclusions of 19 June 2009, recommended that a European System of Financial Supervisors, comprising three new European Supervisory Authorities, be established. The system should be aimed at upgrading the quality and consistency of national supervision, strengthening oversight of cross border groups and establishing a European single rule book applicable to all financial institutions in the Single Market.

It should be noted that this proposal is closely linked to proposals on:

- a European Banking Authority ([EBA](#)),
- a European Securities and Markets Authority ([ESMA](#)),
- a European Systemic Risk Board ([ESRB](#)).

IMPACT ASSESSMENT: the May Commission Communication on Financial Supervision in Europe was accompanied by an impact assessment analysing the main policy options for establishing the ESFS and ESRB. A second impact assessment accompanies these proposals, examining the options in more detail (see [SEC\(2009\)1234](#).)

CONTENT: in order to take account of sectoral specificities, three separate Regulations are needed to establish the Authorities for banking, insurance and occupational pensions, and securities. The broad thrust of these proposals is, however, identical. The proposal discusses the common elements and briefly touches upon the differences between the three Regulations.

Objectives of the ESAs: these shall be to contribute to: (i) improving the functioning of the internal market, including in particular a high, effective and consistent level of regulation and supervision, (ii) protecting depositors, investors, policyholders and other beneficiaries, (iii) ensuring the integrity, efficiency and orderly functioning of financial markets, (iv) safeguarding the stability of the financial system, and (v) strengthening international supervisory coordination.

The ESAs will be Community bodies with a legal personality and a key element of the proposed ESFS. The latter shall function as a network of supervisors and comprise the national authorities in the Member States, a Joint Committee of European Supervisory Authorities, to cover cross-sectoral issues, and the European Commission. While the ESAs should enjoy maximum independence to objectively fulfil their mission, the Commission has to be involved where institutional reasons and the responsibilities under the Treaty so require.

The main decision-making body of each ESA will be its Board of Supervisors, consisting of the heads of the relevant national supervisors as well as the Chairperson of the respective Authority. The Chairperson will preside over meetings of the Board of Supervisors and the Management Board. The day-to-day management of each Authority will be in the hands of an Executive Director.

Tasks and powers: the ESAs will take on all the tasks of the existing European supervisory committees, but also have significantly increased responsibilities, defined legal powers and greater authority.

Develop technical standards: a single EU rule book should be established, applicable to all financial institutions in the Single Market. To this end, differences in the national transposition of Community law stemming from exceptions, derogations, additions or ambiguities must be removed, so that one harmonised core set of standards can be defined and applied. To contribute to this, the Authorities will develop draft technical standards. These standards constitute an effective instrument to strengthen Level 3 of the Lamfalussy structure, which currently is limited to the adoption of non-binding guidelines.

Powers to ensure the consistent application of Community rules: a mechanism will be put in place to address behaviour by national supervisory authorities who are considered to be diverging from the existing Community legislation (including technical standards). The proposal describes the steps of the mechanism.

Action in emergency situations: whilst ESAs will have a coordination role between national supervisory authorities, in some emergency situations coordination may not be sufficient, notably when national supervisors alone lack the tools to respond rapidly to an emerging cross-border crisis. The ESAs should therefore have the power to require national supervisors to take specific action jointly. The determination of a cross-border emergency situation will be left to the Commission. This is subject to the safeguard clause.

Settlement of disagreements between national supervisory authorities: a mechanism is proposed to ensure that relevant national supervisory authorities take due account of the interests of other Member States, including within colleges of supervisors. This mechanism consists of three possible steps which are set out in the text.

Colleges of supervisors: the latter are central to the EU supervisory system and play an important role in ensuring a balanced flow of information between home and host authorities. The ESAs will contribute to promoting the efficient and consistent functioning of colleges of supervisors and may participate as observers in colleges of supervisors and receive all relevant information shared between the members of the college.

Common supervisory culture: the ESAs shall play an active role in building a common European supervisory culture and ensuring uniform procedures and consistent supervisory practices throughout the Community. The common supervisory culture may increasingly create opportunities for supervisors to delegate certain tasks to one another. The ESAs shall periodically conduct peer review analysis of national supervisory authorities.

Assessment of market developments: although the proposed ESRB will be responsible for macro-prudential analysis of the EU financial sector, the ESAs should continue the work of the existing European supervisory committees in this area as: (i) the focus of their analysis is different, i.e., micro-prudential analysis provides a bottom-up analysis, rather than macro-prudential analysis which is top-down, and (ii) their analysis may serve as helpful input into the work carried-out by the ESRB.

International role: through these proposals the Commission is responding to the weaknesses identified during the crisis as well as to the G20 call to take action to build a stronger, more globally consistent, regulatory and supervisory system for financial services. The ESAs could serve as helpful contact points for supervisory authorities from third countries. They may enter into administrative arrangements with administrations

of third countries and may also assist in preparing equivalence decisions pertaining to supervisory regimes in third countries. They may provide advice to the European Parliament, the Council and the Commission or publish opinions, including with respect to the prudential assessments of cross-border mergers and acquisitions.

Collection of information: at the request of the Authority, supervisory authorities and other public authorities of the Member States shall provide the Authority with all the necessary information to carry out the duties assigned to it by this Regulation. In principle, all information should be transferred to the ESAs by the national supervisory authorities.

Relationship with the ESRB: the framework for EU supervision can only work if the ESRB and ESFS cooperate closely. In fulfilling its role as macro-prudential supervisor, the ESRB would need a timely flow of micro-prudential information, while micro-prudential supervision by national authorities would benefit from the ESRB's insights on the macro-prudential environment. The Regulations also specify the procedures to be followed by the ESAs to act upon recommendations by the ESRB and how the ESAs should use their powers to ensure timely follow-up to recommendations addressed to one or more national supervisory authorities.

Safeguard: in view of the fact that decisions by the ESAs should not impinge on the fiscal responsibilities of the Member States, a safeguard clause is introduced which ensures that, where a Member State considers that a decision taken under provisions concerning emergency decisions or settlement of disagreements of these Regulations impinges on its fiscal responsibility, it may notify the Authority and the Commission that the national supervisory authority does not intend to implement the Authority's decision, clearly demonstrating how the decision by the Authority impinges on its fiscal responsibilities.

Joint Committee of European Supervisory Authorities: a Joint Committee of European Supervisory Authorities will ensure mutual understanding, cooperation and consistent supervisory approaches between the three new ESAs.

Board of Appeal: an appeal system will ensure that any person, including national supervisory authorities, may in first instance appeal to a Board of Appeal against a decision by the ESAs to ensure the coherent application of Community rules, action in emergency situations, and the settlement of disagreements. The Board of Appeal shall be a joint body of three ESAs, i.e., it will deal with issues related to banking, insurance and securities.

Key differences between the three Regulations: the main differences between the three proposed Regulations concern the objectives of the Authorities, the scope of action, and the definitions, which are adapted to the specificities of the relevant sector and existing Community legislation. Moreover, the European Council concluded that the ESAs should also have supervisory powers for credit rating agencies. ESMA would be responsible to register credit rating agencies. ESMA would also be empowered to take supervisory measures such as withdrawing the registration or suspending the use for regulatory purposes of credit ratings. Supervisory powers could include the power to request information and to conduct investigations or on-site inspections. The responsibilities and powers of ESMA with regard to credit rating agencies will be defined in an amendment to the Regulation on Credit Rating Agencies.

BUDGETARY IMPLICATIONS: for the transformation of the existing European supervisory committees into effective ESAs, enhanced resources are needed - both personnel and budgetary. For the EIOPA, the total operational expenditure from the Community budget in commitment and payment appropriations for the years 2011-2013 is EUR 16.984 million. In addition, Member States (national supervisory authorities or ministries of finance) will contribute EUR 25.476 million over the three year period. This gives a total of EUR 42.459 from 2011 to 2013.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

The Council agreed on a general approach on draft regulations aimed at establishing three new authorities for the supervision of financial services in the EU, namely:

- [a European Banking Authority](#);
- a European Insurance and Occupational Pensions Authority;
- [a European Securities and Markets Authority](#).

It asked the presidency to start negotiations with the European Parliament with a view to adoption of the texts at first reading.

The draft regulations are part of a package of proposals to reform the EU framework for the supervision of banking, insurance and securities markets in the wake of the global financial crisis.

Negotiations with the Parliament on the macro-financial aspects of the package are already underway. At its meeting on 20 October, the Council reached agreement on a draft regulation aimed at establishing a [European Systemic Risk Board \(ESRB\)](#) to monitor potential threats to the stability of the financial system.

The three European supervisory authorities (ESAs) will be part of a European System of Financial Supervisors, working in tandem with a network of Member State supervisors. Together, they constitute the micro-financial aspects of the reform package.

Entry into force will only be possible once all of the texts have been adopted; the aim is for the new framework to be put into place during the course of 2010.

In June, the European Council supported the creation of both the ESRB and the European System of Financial Supervisors, calling for:

- an upgrading of the quality and consistency of national supervision;
- a strengthening of the oversight of cross-border financial groups through the setting up of supervisory colleges;
- the establishment of a single rule book applicable to all financial institutions in the EU.

The three ESAs are due to replace three existing EU committees of supervisors (CEBS, CEIOPS and CESR) and will have legal personality under EU law. They will comprise high-level representatives of all national supervisory authorities, under a permanent chairmanship. The national authorities will remain responsible for day-to-day supervision of individual firms, and a steering committee will be set up to ensure cooperation and to coordinate the sharing of information between the ESAs and the ESRB.

According to the Council's general approach, the ESAs would be responsible for:

- ensuring that a single set of harmonised rules and consistent supervisory practices is applied by national supervisors;
- ensuring a common supervisory culture and consistent supervisory practices;
- collecting micro-prudential information;
- ensuring consistent application of EU rules, in cases such as the manifest breach of EU law or ESA standards and disagreement between national supervisors or within a college of supervisors.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

OPINION OF THE EUROPEAN CENTRAL BANK on three proposals for regulations of the European Parliament and of the Council establishing a European Banking Authority (EBA), a European Insurance and Occupational Pensions Authority (EIOPA) and a European Securities and Markets Authority (ESMA).

The ECB notes that the observations contained in its opinion must be read in conjunction with ECB Opinion CON/2009/88 of 26 October 2009 on a proposal for a regulation of the European Parliament and of the Council on Community macro-prudential oversight of the financial system and establishing a European Systemic Risk Board (ESRB) and a [proposal for a Council decision](#) entrusting the European Central Bank with specific tasks concerning the functioning of the ESRB; these two proposals form part of the legislative package adopted by the Commission on 23 September 2009 in view of the reform of European financial supervision.

The ECB makes the following general observations:

The proposed European Union institutional framework for supervision: the proposals are part of a comprehensive review of the EU institutional framework for supervision, which includes both the enhancement of micro-prudential supervision through the establishment of the ESAs, (European Supervisory Authorities) and the designation of the ESRB (European Systemic Risk Board). As a new independent body, responsible for safeguarding financial stability by conducting macro-prudential supervision at the European level. The ECB broadly welcomes the proposed institutional framework.

The ESAs and approximation of laws in the financial sector: the proposed regulations reflect the need to introduce an effective instrument to establish harmonised technical standards in financial services to ensure, through a single rulebook, a level playing field and an adequate protection of depositors, investors and consumers in Europe. The ECB welcomes this approach in view of its long-standing support for the development of an EU financial services rulebook. Moreover, the ESAs, as bodies with highly specialised expertise, are well placed to assist in the process of harmonisation in the financial sector by contributing to the establishment of high quality common regulatory and supervisory practices, in particular by providing opinions to the EU institutions and by developing guidelines, recommendations, and draft technical standards.

The ECB makes the following specific observations:

Relation between the ESAs and the ESRB: the ECB strongly supports efficient institutional arrangements for cooperation between the ESAs and the ESRB. This requires effective information sharing procedures in order to ensure a smooth interaction of supervision at the macro-prudential and micro-prudential levels and the timely access of the ESRB to all relevant information required to perform its duties, including micro-prudential information relevant for macro-prudential analysis. The ECB notes in this respect that one of the main tasks of the ESAs will concern cooperation with the ESRB, in particular by providing the latter with the information necessary for the achievement of its tasks. While the ECB welcomes the fact that the proposed regulations provide for the close involvement of the ESRB within the new micro-prudential institutional framework, it suggests an amendment with a view to ensuring that any obstacles to smooth flows of information between the ESRB and the ESFS are removed. These rules on exchange of confidential information under the regulations will complement the other relevant EU rules on these matters, including the ESRB regulation.

Relation between the ESAs and the ESCB: the ECB and the national central banks (NCBs) of the ESCB are closely involved, given their competences and technical expertise, in the current EU financial architecture. The proposed regulations should also ensure an adequate institutional involvement and participation of the ECB and, where appropriate, of the NCBs of the ESCB, as regards the ESAs and newly established committees.

More specifically, the ESCB's involvement in payment, clearing and settlement systems reflects the task assigned to it by the Treaty of promoting the smooth operation of payment systems. Safe and efficient post-trading infrastructures for securities markets are a critical component of the financial system and any malfunctioning of securities clearing and settlement systems can have serious systemic repercussions for the smooth functioning of payments systems, as well as for financial stability. In the light of the central banks' oversight tasks concerning payment, clearing and settlement systems, effective cooperation between central banks in their oversight capacity and supervisory authorities is required. Recent events have confirmed that central banks may be extensively involved in the context of a crisis situation as suppliers of liquidity to the banking system. This is particularly the case when a crisis materialises through an event relating to the liquidity conditions in the money markets and/or to the functioning of payment or securities settlement systems. Against this backdrop, central bank access to supervisory information on financial institutions may be relevant to the conduct of macro-prudential monitoring, the oversight of payment, clearing and settlement systems and the safeguarding of financial stability in general. While gateways for information sharing already exist in the context of EU financial sector legislation between competent authorities and central banks, it should be ensured for both substantive and consistency reasons that the proposed regulations provide for equivalent arrangements as regards the exchange of information between the ESAs and the ESCB when conducting their respective tasks.

ESAs and compliance with the monetary financing prohibition: when an NCB is a competent authority for the supervision of credit and/or financial institutions under national law, the NCB's performance of this task cannot constitute prohibited monetary financing under Article 123 of the Treaty. Insofar as the financing of each ESA consists, in particular, of obligatory contributions from the national authorities competent for the supervision of credit and/or financial institutions, it is not contrary to the prohibition of monetary financing for an NCB to contribute to the revenues of the ESA which, in such circumstances, would only involve the financing by the NCB of the performance of its own supervisory tasks.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

The Committee on Economic and Monetary Affairs adopted the report drawn up by Peter SKINNER (S&D, UK) on the proposal for a regulation of the European Parliament and of the Council establishing a European Insurance and Occupational Pensions Authority. It recommended that the European Parliament's position at first reading under the ordinary legislative procedure (formerly known as the codecision procedure) should be to amend the Commission proposal as follows:

Scope of action: a new clause clarifies that the Authority shall act in the field of activities covered by the legislation referred to in the text, including matters relating to shareholder rights, corporate governance, auditing, and financial reporting, in order to ensure the effective and consistent application of the legislative acts referred to in the text. The Authority shall also take appropriate action in the context of takeover bids, clearing and settlement issues, securitisation, short selling and derivative issues including standardization.

The committee added to the Authority's objectives, stressing, inter alia, the prevention of regulatory arbitrage, precluding the generation of future credit bubbles from the Union's financial institutions; and developing common methodologies for assessing the effect of product characteristics and distribution processes on the financial position of institutions and on customer protection.

The European System of Financial Supervision: a new clause sets out the bodies that will comprise the ESFS. It states that the Authorities forming part of the ESFS, including the competent authorities of the Member States, shall be accountable to the European Parliament without prejudice to their accountability of Member States' competent authorities to national parliaments. The Authority shall cooperate regularly and closely, ensure cross-sectoral consistency of work and arrive at joint positions in the area of supervision of financial conglomerates and on other cross-sectoral issues with the European Systemic Risk Board as well as with the European Supervisory Authority (Banking) and the European Supervisory Authority (Securities and Markets) through the Joint Committee.

Tasks: the committee considerably expanded the list of the Authority's tasks, and added, inter alia, that it must act as the competent body to manage crisis of cross border institutions that have the potential to pose a systemic risk, leading and executing all early interventions, resolution or insolvency procedures for such institutions through its Resolution Unit. It must also:

- provide a database of registered financial institutions in the area of its competence;
- develop draft implementing standards in the specific cases referred to in the new text;
- collect directly the necessary information concerning financial institutions;
- develop a regulatory standard setting out the minimum information to be made available to the Authority about transactions and market participants and how the coordination of collection is to be carried out and how existing national databases are to be linked in order to ensure that the Authority is always able to access the relevant and necessary information concerning transactions and market participants within its competence.

Powers of the competent authorities that are members of the Authority: a new provision states that competent authorities that are members of the Authority, shall certain have powers to adopt preventative and correcting supervisory measure. These are set out in the text and include the power to temporarily restrict or forbid certain products or types of transactions that may directly or indirectly cause excessive volatility in the markets or perturb all or part of the financial system in the Union, public finances or the real economy.

Regulatory standards: the Commission should endorse draft regulatory standards in order to give them binding legal effect. They should be subject to amendment if, for example, they are incompatible with Union law, do not respect the principle of proportionality or run counter to the fundamental principles of the internal market for financial services as reflected in the Union financial services law. To ensure a smooth and expeditious adoption process for those standards, the Commission should be subject to a time limit for its decision on the endorsement.

Implementing standards: the Authority may develop draft standards to implement legally binding Union acts in the areas specifically set out in the regulation and in the legislative acts referred to in the text. It shall conduct open public consultations on implementing standards as well as on guidelines and recommendations.

Action in emergency situations: the ESRB, upon its own initiative or following a request by the Authority, the Council, the European Parliament or the Commission, may issue a warning declaring the existence of an emergency situation in order to enable the Authority without further requirements to adopt individual decisions. Where the addressee of the decision refuses to comply with Union law or a specific decision taken by the Authority, the Authority may issue proceedings in the national courts, including applications for interim relief.

Settlement of disagreements between competent authorities across sectors: a new clause states that Joint Committee shall settle disagreements that may arise between competent authorities.

Colleges of supervisors: the report states that the Authority shall pay special attention to and address risks of disruption in financial services that (i) is caused by an impairment of all or parts of the financial system and (ii) has the potential to have serious negative consequences for internal market and the real economy (systemic risk). All types of financial intermediaries, markets and infrastructure can potentially be systematically important to some degree. The Authority, in collaboration with the European Systemic Risk Board, shall develop a common set of quantitative and qualitative indicators (risk dashboard) which will serve as the basis to assign a supervisory rating to cross border institutions that potentially could pose a systemic risk. That rating shall be reviewed on a regular basis, to take into account material changes of the risk profile of an institution. The supervisory rating shall be a critical element for the decision to directly supervise or intervene in an ailing institution. The Authority shall exert supervision of cross-border institutions that may pose a systemic risk. In those cases, the Authority shall act through the competent national authorities. The Authority shall establish a Resolution Unit with a mandate to put in practice the clearly defined governance and modus operandi of crisis management from early intervention to resolution and insolvency and lead such procedures. All financial institutions identified as potentially posing a systemic risk must take part in the European Guarantee Scheme as well as in the European Stability Fund. Financial institutions operating in a single Member State shall have the option to join the European Guarantee Scheme or the European Stability Fund. The contributions made to the European Funds shall replace those made to national funds of a similar nature.

Members recommend new tasks for the college, including initiating and coordinating European Union-wide stress tests to assess the resilience of financial institutions to adverse market developments, ensuring an as consistent as possible methodology is applied at the national level to such tests. The Authority shall lead the colleges of supervisors and not merely participate as an observer.

The Authority may issue regulatory and implementing standards, guidelines and recommendations to harmonise supervisory functioning and best practices adopted by the colleges of supervisors. Furthermore, a legally binding mediation role should allow the Authority to solve

disputes between competent authorities. Where no agreement can be reached within the relevant college of supervisors, the Authority may take supervisory decisions directly applicable to the institutions concerned.

The committee goes on to insert new clauses on identification of systemic institutions that potentially could pose a systemic risk, the establishment of a resolution unit and a clause on the European Framework of Insurance Guarantee Schemes. It added that no bilateral agreements concerning delegation shall be entered into concerning those institutions that are identified as potentially posing a systemic risk.

Resolution Unit: the Resolution Unit shall preserve financial stability and minimise the contagion effect of the ailment of the institutions identified as potentially posing a risk to the rest of the system and the economy at large and limit the cost to taxpayers respecting the principle of proportionality, creditors' hierarchy and guaranteeing equal treatment across borders.

European Framework of Insurance Guarantee Schemes: the Scheme shall be established in order to ensure the co-responsibility of insurance institutions on the protection of European policy holders interests and to minimise the cost for the taxpayers. It shall be financed through contributions from all financial institutions identified as systemic institutions that potentially could pose a systemic risk. The contribution to the Scheme shall be determined by, inter alia, the risk exposure of the financial institution.

European Insurance and Occupational Pensions Stability Fund: this Fund is established in order to strengthen the internalisation of the costs of the financial system, including the full recovery of fiscal costs, and to assist in crisis resolution for failing cross-border financial institutions. Financial institutions operating in only one Member State shall have the option to join the fund. The Stability Fund shall adopt appropriate measures to avoid that the availability of aid generates a moral hazard. It is also financed through direct contributions from all financial institutions identified as potentially posing a systemic risk.

International relations: Members want the Authority to represent the Union in all international forums concerning the regulation and supervision of the institutions falling within its scope.

Insurance and Reinsurance Stakeholder Group and Occupational Pensions Stakeholder Group: the Stakeholder Groups shall be consulted on all relevant decisions and actions of the Authority. If actions must urgently be taken and consultation becomes impossible the Stakeholder Groups shall be informed as soon as possible. They will meet at least four times per year.

Not less than 5 of the members shall be independent top-ranking academics. The number of members representing financial institutions shall not exceed 10. Adequate compensation shall be established for members of the Stakeholder Groups representing non-profit organisations.

Safeguards: the provisions of the report are more stringent than those in the proposal. The committee deleted the clause which stated that the Authority shall ensure that no decision adopted under the provisions on actions on emergency situations (Article 10) or on settlement of disagreements between national supervisory authorities (Article 11) impinges in any way on the fiscal responsibilities of Member States. Instead it states that where a Member State considers that a decision taken under the relevant provisions impinges directly and in a significant manner on its fiscal responsibilities, it shall notify the Authority, the Commission and the European Parliament within ten working days after notification of the Authority's decision to the competent authority if it will or will not comply with that decision. The Member State shall justify why and provide an impact assessment on how much the decision impinges on its fiscal responsibilities. The Council's decision to maintain the Authority's decision shall be taken by simple majority of members. The decision to revoke the Authority's decision shall be taken by a qualified majority of its members. In neither of these cases the vote of the Members concerned shall be taken into account. A qualified majority shall be defined as at least 55% of the members of the Council excluding the Member State concerned, comprising at least 65% of the population of the Union excluding the population of the Member State concerned. If a decision adopted under the provisions on emergency situations leads to use of the funds set up according to the Guarantee Schemes or the Stability Funds, Member States shall not call on the Council to maintain or revoke a decision taken by the Authority.

Board of Supervisors and Management Board: the report made some amendments to the composition of these Boards and their decision making.

Chairperson: with regard to appointment, it is now stated that the Commission shall present a shortlist of three candidates to the European Parliament. After conducting hearings of those candidates, the European Parliament shall select one of those candidates. The candidate so selected shall be appointed by the Board of Supervisors. The Chairperson or his or her alternate shall, at least quarterly, make a statement before the European Parliament and answer any questions put by its members.

The European Supervisory Authorities (Joint Committee): the Joint Committee will have its headquarters in Frankfurt. It will cooperate with other ESA's particularly on a specified list of topics. In the event that an institution identified as potentially a systemic risk reaches across different sectors, the Joint Committee shall decide which European Supervisory Authority shall act as leading competent authority and/ or adopt binding decisions to resolve problems between the European Supervisory Authorities.

Remedies: Member States and the Union institutions, as well as any natural or legal person, may lodge a direct appeal before the Court of Justice against decisions of the Authority, in accordance with Article 263 of the Treaty on the Functioning of the European Union.

Financial provisions: revenue for the Authority will consist only of the Union subsidy and of fees. There will be no obligatory contributions from the national public authorities.

For the first year of operation of the Authority, ending on 31 December 2011, the budget shall be approved by the Members of the Level 3 Committee, following consultation with the Commission and then transmitted to European Parliament and the Council for endorsement.

Evaluation: the Commission's report in 3 years must evaluate, inter alia: a) the convergence in supervisory standard practices reached by competent authorities; (b) the functioning of the colleges of supervisors; (c) the role of the Authority on the supervision of institutions which may pose a systemic risk; (d) the application of the Safeguard clause (e) the level of harmonisation of national Insurance Guarantee Schemes. It will also evaluate whether:

- it is appropriate to continue separate supervision of banking, insurance, occupational pensions, securities and financial markets, or whether they should be brought under a single supervisor;
- prudential supervision and supervision of the conduct of business should be combined or separated; it is appropriate to simplify and reinforce the architecture of the ESFS in order to increase the coherence between the macro and the micro levels and between the ESAs;
- it is appropriate to simplify and reinforce the architecture of the ESFS in order to increase the coherence between the macro and the micro levels and between the ESAs;
- it is appropriate to increase the regulatory powers of the ESAs;

- the evolution of the ESFS is consistent with that of the global evolution;
- there is sufficient diversity and excellence within the ESFS;
- accountability and transparency in relation to publication requirements are adequate.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

The European Parliament adopted amendments, by 610 votes to 38 with 34 abstentions, at first reading under the ordinary legislative procedure (formerly known as the codecision procedure), to the proposal for a regulation of the European Parliament and of the Council establishing a European Insurance and Occupational Pensions Authority.

The vote on the legislative resolution was postponed to a future plenary session. The main amendments to the Commission's proposal were as follows:

Establishment and Scope of action: Members stipulate that the Regulation establishes a European Supervisory Authority (European Insurance and Occupational Pensions Authority), whose objective shall be to protect the public interest by contributing to the short, medium and long-term stability and effectiveness of the financial system, for the Union economy, its citizens and businesses. The Authority shall contribute to: (i) preventing regulatory arbitrage and contributing to equal conditions of competition; (ii) ensuring the taking of insurance, pensions and other risks are appropriately regulated and supervised, and (iii) contribute to enhance customer protection.

It shall also act in the field of activities of insurance undertakings, reinsurance undertakings, institutions for occupational retirement provision and insurance intermediaries, including matters of corporate governance, auditing and financial reporting.

In the exercise of the tasks conferred upon it by this Regulation, the Authority shall (i) pay particular attention to any systemic risk posed by financial institutions, failure of which may impair the operation of the financial system or the real economy (ii) act independently and objectively and in the interest of the Union alone.

Seat: the Authority will have its seat in Frankfurt. It may have representations in the most important financial centres of the European Union

The European System of Financial Supervision: a new clause states that the Authority shall form part of a European System of Financial Supervision (ESFS), whose main objective shall be to ensure that the rules applicable to the financial sector are adequately implemented, to preserve financial stability and to ensure confidence in the financial system as a whole and sufficient protection for the customers of financial services.

The ESFS shall comprise: (a) the [ESRB](#); (b) the European Supervisory Authority (Securities and Markets) ([ESMA](#)); (c) the European Supervisory Authority (Insurance and Occupational Pensions); (d) the European Supervisory Authority (Banking) ([EBA](#)); (e) the European Supervisory Authority (Joint Committee) established by Regulations on EBA, ESMA and EIOPA; (f) the authorities in the Member States as specified in the Regulations on EBA and ESMA and EIOPA; (g) the Commission, for the purposes of carrying out the tasks referred to in the Regulation on EBA, ESMA and EIOPA.

The Authorities shall be accountable to the European Parliament.

Tasks : Parliament has extended the Authority's tasks and these now include:

- undertaking economic analyses of markets;
- fostering depositor and investor protection;
- help to manage crisis of cross-border institutions that have the potential to pose a systemic risk, leading and executing all early interventions, resolution or insolvency procedures for such institutions through its Insurance and Pensions Resolution Unit;
- supervising those financial institutions that are not subject to the supervision of competent authorities;
- publishing on its website and regularly updating information relating to its field of activities, in particular, within the area of its competence, on registered financial institutions, in order to ensure easily accessible information to the public;
- taking over, as appropriate, all existing and ongoing tasks from the Committee of Insurance and Occupational Pensions Supervisors.

Tasks related to consumer protection and financial activities: in order to foster policyholders and beneficiary protection the Authority shall take a leading role in promoting transparency, simplicity and fairness in the market for financial products or services across the single market, including by: (i) collecting, analysing and reporting on consumer trends; (ii) reviewing and coordinating financial literacy and education initiatives; (iii) developing training standards for the industry; (iv) contributing to the development of common disclosure rules, and (v) assess, in particular, the accessibility, availability and credit cost for households and enterprises, in particular SMEs.

The Authority shall monitor new and existing financial activities and may adopt guidelines and recommendations with a view to promote the safety and soundness of markets and convergence of regulatory practice. It may also issue warnings in case a financial activity poses a serious threat to its objectives.

It shall establish, as an integral part of the Authority, a Committee on financial innovation, which gathers all relevant competent national supervisory authorities with a view to achieving a coordinated approach to the regulatory and supervisory treatment of new or innovative financial activities and providing advice to the European Parliament, the Council and the Commission.

The Authority may also temporarily prohibit or restrict certain types of financial activities that threaten the orderly functioning and integrity of financial markets or the stability of the whole or part of the financial system in the Union in the cases specified and under the conditions laid down in the legislative acts or if so required in the case of an emergency situation.

Regulatory technical standards: the European Parliament and the Council may delegate powers to the Commission to adopt regulatory technical standards under Article 290 TFEU in order to ensure consistent harmonisation in the areas specifically set out in the legislative acts referred to in the text. Those standards shall be technical, not imply strategic decisions or policy choices and their content shall be delimited by the legislative acts on which they are based. Draft regulatory technical standards shall be developed by the Authority and submitted to the Commission for endorsement.

The Authority shall conduct open public consultations on regulatory technical standards and analyse the potential related costs and benefits, unless such consultations and analyses are disproportionate in relation to the scope and impact of the regulatory technical standards

concerned or in relation to the particular urgency of the matter before submitting them to the Commission. The Authority shall also request the opinion or advice of the Stakeholder Groups referred to in the text. The Commission shall upon receipt of a draft regulatory technical standard from the Authority forward it immediately to the European Parliament and the Council. The Commission shall decide within three months of receipt whether to adopt a draft regulatory technical standard. If the Commission does not intend to adopt the standard it shall inform the European Parliament and Council of this and of the reasons for this.

The Commission may be empowered to adopt implementing technical standards under Article 291 TFEU where uniform conditions for implementing legally binding Union acts are needed in the areas specifically set out in legislative acts. Where the Authority drafts implementing technical standards for submission to the Commission, those standards shall be technical, shall not include policy choices and shall be limited to determining the conditions of application of legally binding Union acts.

Guidelines and recommendations: the competent authorities and financial institutions shall make every effort to comply with those guidelines and recommendations. Within two months of the issuance of a guideline or recommendation, each competent authority shall confirm that it intends to comply with that guideline or recommendation. In the event that a competent authority does not intend to comply, it shall inform the Authority, stating reasons. The Authority shall publish those reasons.

Action in emergency situations: in the case of adverse developments which may seriously jeopardise the orderly functioning and integrity of financial markets or the stability of the whole or part of the financial system in the EU, the Authority shall actively facilitate and, where deemed necessary, coordinate any actions undertaken by the relevant national competent supervisory authorities.

The Commission may, on its own initiative or at the request of the European Parliament, the Council, the ESRB or the Authority, adopt a decision addressed to the Authority, determining the existence of an emergency situation for the purposes of this Regulation. The Commission shall review that decision at monthly intervals and shall declare the discontinuation of the emergency situation as soon as appropriate. If the Commission determines the existence of an emergency situation, it shall duly inform the European Parliament and the Council without delay.

Colleges of supervisors: the Authority shall contribute to promote and monitor the efficient, effective and consistent functioning of the colleges of supervisors and foster the coherence of the application of Union law among the colleges of supervisors. It shall, at least: (a) collect and share all relevant information in going concern and emergency situations in order to facilitate the work of the colleges of supervisors and establish and manage a central system to make such information accessible to the competent authorities in the colleges of supervisors; (b) initiate and coordinate Union-wide stress tests to assess the resilience of financial institutions to adverse market developments, ensuring an as consistent as possible methodology is applied at the national level to such tests; (c) plan and lead supervisory activities in going concern as well as in emergency situations, including evaluating the risks to which financial institutions are or might be exposed; and (d) oversee the tasks carried out by the competent authorities.

A legally binding mediation role should allow the Authority to solve disputes between competent authorities. Where no agreement can be reached within the relevant college of supervisors, the Authority may take supervisory decisions directly applicable to the institution concerned.

Risk dashboard: the Authority shall pay special attention to and address risks of disruption in financial services that (i) is caused by an impairment of all or parts of the financial system and (ii) has the potential to have serious negative consequences for internal market and the real economy (systemic risk). All types of financial intermediaries, markets and infrastructure can potentially be systematically important to some degree. In collaboration with the European Systemic Risk Board, it shall develop a common set of quantitative and qualitative indicators (risk dashboard), which will serve as the basis to assign a supervisory rating to cross-border institutions. That rating shall be reviewed on a regular basis, to take into account material changes of the risk profile of an institution. The supervisory rating shall be a critical element for the decision to directly supervise or intervene in an ailing institution.

Resolution Unit: the Banking Resolution Unit shall preserve financial stability and minimise the contagion effect of distressed institutions to the rest of the system and the economy at large and limit the cost to taxpayers respecting the principle of proportionality, creditors' hierarchy and guaranteeing equal treatment across borders.

Among other actions it could require adjustments in capital or liquidity, adapt the business mix, improve processes, appoint or replace management, recommend guarantees, loans and liquidity assistance, total or partial sales, create a good bank/bad bank or a bridge bank, swap debt into equity (with appropriate haircuts) or take the institution into temporary public ownership.

European Framework of National Insurance Guarantee Schemes: the Authority shall contribute to the development of a European Framework of National Insurance Guarantee Schemes by acting under the powers conferred to it in the Regulation to ensure that national insurance guarantee schemes are adequately funded by contributions from relevant financial institutions including from those financial institutions within the Union but headquartered in another Member State or outside the Union and provide a high level of protection to all policyholders in a harmonised framework throughout the Union

European Insurance and Occupational Pensions Stability Fund: this Stability Fund shall be established in order to strengthen the internalisation of the costs of the financial system, including the full recovery of fiscal costs, and to assist in crisis resolution for failing cross-border financial institutions. Financial institutions operating in only one Member State shall have the option to join the fund. The Stability Fund shall adopt appropriate measures to avoid that the availability of aid generates a moral hazard. It shall be financed through direct contributions from all financial institutions identified as presenting a systemic risk.

Insurance and Reinsurance Stakeholder Group and Occupational Pensions Stakeholder Group: to help facilitate consultation with stakeholders in areas relevant to the tasks of the Authority, the Stakeholder Groups shall be established. They shall be consulted on actions taken concerning regulatory technical standards and implementing technical standards and, to the extent that these do not concern individual financial institutions, provisions guidelines and recommendations. If actions must urgently be taken and consultation becomes impossible, the Stakeholder Groups shall be informed as soon as possible.

Safeguards: the text now states that where a Member State considers that a decision taken under Article 10(2) (emergency measures) or Article 11 (disagreements between national authorities) impinges directly and in a significant manner on its fiscal responsibilities, it shall notify the Authority, the European Parliament and the Commission within ten working days after notification of the Authority's decision to the competent authority. In its notification, the Member State shall justify why and provide an impact assessment on how much the decision impinges on its fiscal responsibilities. Where the Authority maintains or amends its decision, the Council shall take a decision whether the Authority's decision is maintained or revoked. The decision to maintain the Authority's decision shall be taken by simple majority of members. The decision to revoke the Authority's decision shall be taken by a qualified majority of its members. In neither of these cases the vote of the Members concerned shall be taken into account.

Board of supervisors: Members introduced amendments on provisions regarding the organisation and composition of the board of supervisors. When carrying out the tasks conferred upon it by this Regulation, the Chairperson and the voting members of the Board of Supervisors shall act independently and objectively in the sole interest of the Union as a whole and shall neither seek nor take instructions from Union institutions or bodies, from a Government of a Member State or from any other public or private body.

Joint committee: Parliament introduces a joint committee, which shall serve as a forum in which the Authority cooperates regularly and closely and ensure cross-sectoral consistency with the other ESAs, in particular regarding: (i) financial conglomerates; (ii) accounting and auditing; (iii) micro-prudential analyses of cross-sectoral developments, risks and vulnerabilities for financial stability; (iv) retail investment products; (v) anti-money laundering measures; and (vi) information exchange with the ESRB and developing the relationship between the ESRB and the European Supervisory Authorities .

Review clause: six months after entry into force of the Regulation, the Commission shall submit to the European Parliament and the Council the necessary proposals to strengthen supervision of institutions that may pose a systemic risk and the establishment of a new framework for financial crisis management including funding arrangements.

Three years after the date of application of the regulation, and every three years thereafter, the Commission shall publish a general report on the experience acquired as a result of the operation of the Authority and the procedures laid down in this Regulation. That report shall evaluate, inter alia: (a) the convergence in supervisory practices reached by competent authorities; (b) the functioning of the colleges of supervisors; (c) progress achieved towards convergence in the fields of crisis prevention, management and resolution, including European funding mechanisms; (d) whether, in particular in light of the progress achieved with regard to the issues referred to in point (c), the role of the Authority in the supervision of financial institutions posing a potential systemic risk should be strengthened and whether it should exercise enhanced supervisory powers over those institutions; (e) the application of the safeguard clause.

The report shall also examine whether:

- it is appropriate to move the Authorities to a single seat to enhance a better coordination between them;
- it is appropriate to continue separate supervision of banking, insurance, occupational pensions, securities and financial markets;
- it is appropriate to supervise prudential supervision and the conduct of business separately or by the same supervisor;
- it is appropriate to simplify and reinforce the architecture of the ESFS in order to increase the coherence between the macro and the micro levels and between the ESAs;
- the evolution of the ESFS is consistent with that of the global evolution;
- there is sufficient diversity and excellence within the ESFS;
- accountability and transparency in relation to publication requirements are adequate;
- the appropriateness of the seat of the Authority;
- to establish a Insurance Stability Fund at EU level as the best defence against competitive distortion and most efficient way to deal with the failure of a cross-border institution.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

The Council adopted a political guideline with a view to continuing negotiations with the European Parliament on a package of measures which are intended to reform the European framework for supervision of the financial system, in the wake of the global financial crisis.

The proposals, presented by the Commission in the autumn of 2009, are:

- draft Regulations on Community macro prudential oversight of the financial system and establishing a European Systemic Risk Board (ESRB), and entrusting the European Central Bank (ECB) with specific tasks concerning the functioning of that Board;
- draft Regulations establishing a European Banking Authority (EBA) a European Insurance and Occupational Pensions Authority (EIOPA) and a European Securities and Markets Authority (ESMA);
- a draft Directive intended to amend existing legislation in respect of the powers of these three new authorities.

Most of these texts are subject to the ordinary legislative procedure (formerly co decision) between the Parliament and the Council. The negotiations with Parliament are intended to allow them to be adopted at first reading, so that the European Systemic Risk Board and the three new supervisory authorities can be operational from 1 January 2011.

There is now a large degree of convergence between the two institutions, thanks to the negotiations which have already taken place, but it has not proven possible to find an overall agreement in time to enable Parliament to hold its first reading on 8 July, as originally intended. Parliament has therefore decided to postpone the vote to a subsequent plenary session.

On the basis of the general approaches already defined, the Council has agreed on the compromise proposals submitted by the Presidency with a view to facilitating continuing negotiations. It has thus strengthened the negotiating mandate given to the Presidency, while allowing it the necessary degree of flexibility.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

The European Parliament adopted a resolution under the ordinary legislative procedure (formerly the co decision procedure).amending the proposal for a regulation of the European Parliament and of the Council establishing a European Insurance and Occupational Pensions Authority (EIOPS). The amendments are the result of a compromise agreement between Parliament and Council. The main points are as follows:

Establishment and scope of action: Members stipulate that the Regulation establishes a European Supervisory Authority (European Insurance and Occupational Pensions Authority). The objective of the Authority shall be to protect the public interest by contributing to the short, medium and long-term stability and effectiveness of the financial system, for the Union economy, its citizens and businesses. The Authority shall contribute to: (a) improving the functioning of the internal market, including in particular a sound , effective and consistent level of regulation and supervision, (ii) ensuring the integrity, transparency , efficiency and orderly functioning of financial markets, (iii) strengthening international supervisory coordination, (iv) preventing regulatory arbitrage and promoting equal conditions of competition, (v) ensuring the

taking of risks related to insurance, reinsurance and occupational pensions activities is appropriately regulated and supervised, and (vi) enhancing customer protection.

In the exercise of the tasks conferred upon it, the Authority shall (i) pay particular attention to any systemic risk posed by financial institutions, failure of which may impair the operation of the financial system or the real economy (ii) act independently and objectively and in the interest of the Union alone.

Seat: the Authority shall have its seat in Frankfurt am Main.

The European System of Financial Supervision: a new clause states that the Authority shall form part of a European System of Financial Supervision (ESFS), whose main objective shall be to ensure that the rules applicable to the financial sector are adequately implemented, to preserve financial stability and to ensure confidence in the financial system as a whole and sufficient protection for the customers of financial services.

The compromise text states that the ESFS shall comprise: (a) the [ESRB](#); (b) the European Supervisory Authority (Securities and Markets) ([ESMA](#)); (c) the European Supervisory Authority (Insurance and Occupational Pensions) ([EIOPA](#)); (d) the EBA (e) the Joint Committee of the European Supervisory Authorities (f) the competent or supervisory authorities in the Member States specified in the Regulations on EBA and ESMA and EIOPA.

The ESRB, ESMA, EBA and EIOPA shall be accountable to the European Parliament and the Council.

Tasks: the text extends the Authority's tasks and these now include:

- undertaking economic analyses of markets to inform the discharge of the Authority's functions;
- fostering policyholder and beneficiary protection;
- contributing to the consistent and coherent functioning of supervisory colleges, the monitoring, assessment and measurement of systemic risk, the development and coordination of recovery and resolution plans, providing a high level of protection for policy holders, beneficiaries and throughout the Union;
- publishing on its website and regularly updating information relating to its field of activities, in particular, within the area of its competence, on registered financial institutions, in order to ensure information is easily accessible by the public;
- taking over, as appropriate, all existing and ongoing tasks from the Committee of European Insurance and Occupational Pensions Supervisors (CEIOPS).

Tasks related to consumer protection and financial activities: the Authority shall take a leading role in promoting transparency, simplicity and fairness in the market for consumer financial products or services across the single market, including by: (i) collecting, analysing and reporting on consumer trends; (ii) reviewing and coordinating financial literacy and education initiatives by the competent authorities; (iii) developing training standards for the industry; (iv) contributing to the development of common disclosure rules.

The Authority shall monitor new and existing financial activities and may adopt guidelines and recommendations with a view to promote the safety and soundness of markets and convergence of regulatory practice. It may also issue warnings in case a financial activity poses a serious threat to its objectives.

It shall establish, as an integral part of the Authority, a Committee on financial innovation, which gathers all relevant competent national supervisory authorities with a view to achieving a coordinated approach to the regulatory and supervisory treatment of new or innovative financial activities and providing advice to the European Parliament, the Council and the Commission.

The Authority may also temporarily prohibit or restrict certain types of financial activities that threaten the orderly functioning and integrity of financial markets or the stability of the whole or part of the financial system in the Union in the cases specified and under the conditions laid down in the legislative acts or if so required in the case of an emergency situation..

Regulatory technical standards: where the European Parliament and the Council delegate power to the Commission to adopt regulatory technical standards by means of delegated acts under Article 290 TFEU in order to ensure consistent harmonisation in the areas specifically set out in the legislative acts, the Authority may develop draft regulatory technical standards and submit its draft standards to the Commission for endorsement. Regulatory technical standards shall be technical, shall not imply strategic decisions or policy choices and their content shall be delimited by the acts on which they are based.

Where the Authority submits a draft regulatory technical standard, the Commission shall immediately forward it to the European Parliament and the Council. The Commission shall decide within three months of receipt whether to adopt a draft regulatory technical standard.

The Authority may develop implementing technical standards, by means of implementing acts under Article 291 TFEU, in the areas specifically set out in the legislative acts. These standards shall be technical, not imply strategic decisions or policy choices and their content shall be to determine the conditions of application of that legislation. The Authority shall submit its draft standards to the Commission for endorsement.

Guidelines and recommendations: the competent authorities and financial institutions shall make every effort to comply with those guidelines and recommendations. Within two months of the issuance of a guideline or recommendation, each competent authority shall confirm whether it complies or intends to comply with that guideline or recommendation. In the event that a competent authority does not comply or intend to comply, it shall inform the Authority, stating its reasons. The Authority shall publish the fact that a competent authority does not comply or intend to comply with that guideline or recommendation. It may also decide, on a case-by-case basis, to publish the reasons provided by the competent authority for not complying with that guideline or recommendation. The competent authority shall receive advanced notice about such a publication

Action in emergency situations: the Council, in consultation with the Commission and the ESRB and, where appropriate, the European Supervisory Authorities, may adopt a decision addressed to the Authority, determining the existence of an emergency situation for the purposes of this Regulation, following a request by the Authority, the Commission or the ESRB. The Council shall review this decision at appropriate intervals and at least once a month. If the decision is not renewed after one month, it shall automatically expire. The Council may declare the discontinuation of the emergency situation at any time.

Where the ESRB or the ESAs deem that an emergency situation may arise, they shall issue a confidential recommendation addressed to the Council and provide it with an assessment of the situation. The Council shall then assess the convenience of convening a meeting. In that process, due care of confidentiality shall be guaranteed. If the Council determines the existence of an emergency situation, it shall duly inform the European Parliament and the Commission without delay.

Where the Council has adopted a decision, and in exceptional circumstances where co-ordinated action by national authorities is necessary to respond to adverse developments which may seriously jeopardise the orderly functioning and integrity of financial markets or the stability of the whole or part of the financial system in the Union, the Authority may adopt individual decisions requiring competent authorities to take the necessary action.

Settlement of disagreements between competent authorities in cross-border situations: the compromise text states that where on the basis of objective criteria, disagreement between competent authorities from different Member States can be determined, the Authority may, on its own initiative, assist the authorities in reaching an agreement. If, at the end of the conciliation phase, the competent authorities concerned have failed to reach an agreement, the Authority may, in accordance with the procedure set out in the text take a decision requiring them to take specific action or to refrain from action in order to settle the matter, with binding effects for the competent authorities concerned, in order to ensure compliance with Union law. Decisions adopted by the Authority shall prevail over any previous decision adopted by the competent authorities on the same matter.

The Joint Committee will settle cross sectoral disagreements that may arise between one or more competent authorities.

Colleges of supervisors: Parliament expanded on the tasks of the colleges, entrusting them with, inter alia, initiating and coordinating Union-wide stress tests to assess the resilience of financial institutions to adverse market developments, and overseeing the tasks carried out by the competent authorities.

A legally binding mediation role should allow the Authority to solve disputes between competent authorities in accordance with the procedure set out in the text.

Systemic risk: the Authority shall duly consider systemic risk as defined by the ESRB Regulation meaning a risk of disruption in the financial system with the potential to have serious negative consequences for the internal market and the real economy and address risks of disruption in financial services that: is caused by an impairment of all or parts of the financial system; and has the potential to have serious negative consequences for the internal market and the real economy. The Authority, in collaboration with the ESRB, shall develop a common approach to the identification and measurement of systemic importance, including quantitative and qualitative indicators as appropriate. It will also develop an adequate stress testing regime to help identifying those institutions that may pose systemic risk. These institutions shall be subject to strengthened supervision, and where necessary, to the recovery and resolution procedures referred to in the text.

The compromise text contains provisions on the identification and measurement of systemic risk, and on recovery and resolution procedures.

Development of a European network of national Insurance Guarantee Schemes: the Authority may contribute to the assessment of the need for a European network of national Insurance Guarantee Schemes which is adequately funded and sufficiently harmonised.

Crisis prevention, management and resolution: the compromise text contains a new clause specifying that the Authority may be requested by the Commission to contribute to the assessment as regards the cooperation of supervisory authorities within, and functionality of, colleges of supervisors, the supervisory practices concerning setting the capital add-ons, the assessment of the benefit of enhancing group supervision and capital management within a group of insurance or reinsurance undertakings, including possible measures to enhance a sound cross-border management of insurance groups notably in respect of risks and asset management.

Safeguards: the provisions in the text are now closer to the Commission's original proposal. The Authority shall ensure that no decision adopted under Articles 10 (Action in emergency situations) or 11 (settlement of disagreements) impinges in any way on the fiscal responsibilities of Member States. Where a Member State considers that a decision taken under the latter article impinges on its fiscal responsibilities, it may notify the Authority and the Commission within two weeks after notification of the Authority's decision to the competent authority that the decision will not be implemented by the competent authority. In its notification, the Member State shall clearly and specifically explain why and how the decision impinges on its fiscal responsibilities. In that case, the decision of the Authority shall be suspended. Within a period of one month from the notification by the Member State, the Authority shall inform the Member State as to whether it maintains its decision or whether it amends or revokes it. If the decision is maintained or amended, the Authority shall state that fiscal responsibilities are not affected.

The compromise text sets out the powers of the Council in the alternatives that the Authority maintains or evokes its decision.

It states that any abuse of this Article, in particular in relation to a decision by the Authority which does not have a significant or material fiscal impact, shall be prohibited as incompatible with the internal market.

Board of supervisors: Members introduced amendments on provisions regarding the organisation and composition of the board of supervisors, and the management board. They also expand the issues in which the Joint Committee will be concerned and make some changes to provisions on the composition and operation of the board of appeal. Parliament will be able to veto the appointment of ESA chairpersons.

Review clause: three years after the date of application of the regulation, and every three years thereafter, the Commission shall publish a general report on the experience acquired as a result of the operation of the Authority and the procedures laid down in this Regulation. That report shall evaluate, inter alia: the convergence in supervisory practices reached by competent authorities; the convergence in functional independence of the competent authorities and in standards equivalent to corporate governance; the impartiality, objectivity and autonomy of the Authority; the functioning of the colleges of supervisors; progress achieved towards convergence in the fields of crisis prevention, management and resolution, including European funding mechanisms, the role of the Authority as regards systemic risk; the application of the safeguard clause; and the application of the binding mediation role.

The report shall also examine whether:

- it is appropriate to continue separate supervision of banking, insurance, occupational pensions, securities and financial markets;
- it is appropriate to supervise prudential supervision and the conduct of business separately or by the same supervisor;
- it is appropriate to simplify and reinforce the architecture of the ESFS in order to increase the coherence between the macro and the micro levels and between the European Supervisory Authorities;
- the evolution of the ESFS is consistent with that of the global evolution;
- there is sufficient diversity and excellence within the ESFS;
- accountability and transparency in relation to publication requirements are adequate;
- the resources of the Authority are adequate to carry out its responsibilities;
- the appropriateness of the seat of the Authority and whether it is appropriate to move the Authorities to a single seat to enhance better coordination between them.

Concerning the issue of direct supervision of institutions or infrastructures of pan-European reach and taking account of market developments, the Commission shall draw up an annual report on the appropriateness of entrusting the Authority with further supervisory responsibilities in this area.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

PURPOSE: to establish a European Insurance and Occupational Pensions Authority (EIOPA) with a view to enhancing the European framework for supervision of the financial system.

LEGISLATIVE ACT: Regulation (EU) No 1094/2010 of the European Parliament and of the Council establishing a European Supervisory Authority (European Insurance and Occupational Pensions Authority), amending Decision No 716/2009/EC and repealing Commission Decision 2009/79/EC.

CONTENT: following an agreement reached with the European Parliament at first reading, the Council adopted a regulation aiming to establish a European Insurance and Occupational Pensions Authority (EIOPA).

The regulation is part of a package of legal texts underpinning a reform of the EU framework for supervision of the financial system, aimed at eliminating deficiencies that were exposed during the financial crisis. The package consists of the following regulations establishing:

It adopted regulations establishing:

- a [European Systemic Risk Board \(ESRB\)](#), which will provide macro-prudential oversight of the financial system;
- a [European Banking Authority \(EBA\)](#) for the supervision of banking services;
- a European Insurance and Occupational Pensions Authority (EIOPA) for the supervision of insurance services;
- a [European Securities and Markets Authority \(ESMA\)](#) for the supervision of the securities industry.

The three European supervisory authorities (ESAs) will work in tandem with the supervisory authorities of the Member States. They will replace three existing committees of supervisors at EU level (Committee of European Banking Supervisors (CEBS), Committee of European Insurance and Occupational Pensions Supervisors (CEIOPS) and Committee of European Securities Regulators (CESR) and will have legal personality under EU law.

The Council also adopted:

- a [regulation](#) entrusting the European Central Bank with specific tasks with regard to the day-to-day running of the ESRB;
- a [directive](#) amending directives 98/26/EC, 2002/87/EC, 2003/6/EC, 2003/41/EC, 2003/71/EC, 2004/39/EC, 2004/109/EC, 2005/60/EC, 2006/48/EC, 2006/49/EC and 2009/65/EC in respect of the powers conferred on the three European authorities.

The main elements of the Regulation are as follows:

Institution and seat: the Authority shall have its seat in Frankfurt am Main. It shall form part of a European System of Financial Supervision (ESFS). The main objective of the ESFS shall be to ensure that the rules applicable to the financial sector are adequately implemented to preserve financial stability and to ensure confidence in the financial system as a whole and sufficient protection for the customers of financial services.

The ESFS shall comprise the following: (i) the ESRB; (ii) the European Banking Authority (EBA); (iii) the European Supervisory Authority (European Insurance and Occupational Pensions Authority); (iv) the European Supervisory Authority (European Securities and Markets Authority); (v) the Joint Committee of the European Supervisory Authorities (Joint Committee); (vi) the competent or supervisory authorities in the Member States referred to in the EBA, ESMA and EIOPA Regulations.

The ESRB, EBA, EIOPA and the Joint Committee shall be accountable to the European Parliament and the Council.

The ESAs will comprise high-level representatives of all of the Member States' supervisory authorities under permanent chairmanships. National authorities will remain responsible for the day-to-day supervision of individual firms, and a joint committee will be set up to ensure cooperation and to coordinate the sharing of information between the ESAs and the ESRB.

Objectives: the objective of the Authority shall be to protect the public interest by contributing to the short, medium and long-term stability and effectiveness of the financial system, for the Union economy, its citizens and businesses.

The Authority shall contribute to: (i) improving the functioning of the internal market, including, in particular, a sound, effective and consistent level of regulation and supervision; (ii) ensuring the integrity, transparency, efficiency and orderly functioning of financial markets; (iii) strengthening international supervisory coordination; (iv) preventing regulatory arbitrage and promoting equal conditions of competition; (v) ensuring the taking of credit and other risks are appropriately regulated and supervised; and (vi) enhancing customer protection.

In the exercise of the tasks, the Authority shall: (i) pay particular attention to any systemic risk posed by financial institutions, the failure of which may impair the operation of the financial system or the real economy; (ii) act independently and objectively and in the interest of the Union alone.

Tasks: the Authority shall have the following tasks:

- to contribute to the establishment of high-quality common regulatory and supervisory standards and practices, in particular by providing opinions to the Union institutions and by developing guidelines, recommendations, and draft regulatory and implementing technical standards;
- to contribute to the consistent application of legally binding Union acts, in particular by contributing to a common supervisory culture;
- to stimulate and facilitate the delegation of tasks and responsibilities among competent authorities;
- to cooperate closely with the ESRB, in particular by providing the ESRB with the necessary information for the achievement of its tasks and by ensuring a proper follow up to the warnings and recommendations of the ESRB;
- to organise and conduct peer review analyses of competent authorities, including issuing guidelines and recommendations and identifying best practices, in order to strengthen consistency in supervisory outcomes;
- to monitor and assess market developments in the area of its competence, including where appropriate trends in credit, in particular,

- to households and SMEs;
- to undertake economic analyses of markets to inform the discharge of the Authority's functions;
- to foster depositor and investor protection;
- to publish on its website, and to update regularly, information relating to its field of activities, in particular, within the area of its competence, on registered financial institutions, in order to ensure information is easily accessible by the public;
- to take over, as appropriate, all existing and ongoing tasks from the Committee of European Banking Supervisors (CEBS).

In addition, the Authority shall contribute to the consistent and coherent functioning of colleges of supervisors, the monitoring, assessment and measurement of systemic risk, the development and coordination of recovery and resolution plans. The ESAs shall provide a high level of protection to depositors and investors throughout the Union and developing methods for the resolution of failing financial institutions and an assessment of the need for appropriate financing instruments.

Powers: the ESAs will be responsible for ensuring that a single set of harmonised rules and consistent supervisory practices are applied by supervisory authorities of the Member States. They will have the power:

- to investigate alleged breaches of EU law. In the event of non-compliance by a national authority, the ESA may, in certain circumstances, take an individual decision addressed to a financial institution, requiring that the necessary action be taken to comply with its obligations under EU law;
- in emergency situations where coordinated action by national authorities is needed, to adopt individual decisions requiring the competent authorities to take the necessary measures. It would be for the Council, in consultation with the Commission and the ESRB (and where appropriate the ESAs), to determine the existence of an emergency situation. If the competent authority doesn't comply with the ESA's decision, the ESA may, in certain circumstances, take an individual decision addressed to a financial institution requiring the necessary action to be taken;
- in the event of disagreements between competent authorities of different Member States, and where mediation by the ESA has failed, to take binding decisions requiring them to take specific action in order to settle the matter, in order to ensure compliance with EU law. If the competent authority doesn't comply with the ESA's decision, the ESA may, in certain circumstances, take an individual decision addressed to a financial institution requiring the necessary action to be taken.

The Authority may temporarily prohibit or restrict certain financial activities that threaten the orderly functioning and integrity of financial markets or the stability of the whole or part of the financial system in the Union in certain cases and under certain conditions or, if so required, in the case of an emergency situation.

Safeguards: the Authority shall ensure that no decision adopted by the ESAs shall impinge in any way on the fiscal responsibilities of Member States.

Development of a European network of national insurance guarantee schemes: the Authority may contribute to the assessment of the need for a European network of national insurance guarantee schemes which is adequately funded and sufficiently harmonised.

Insurance and Reinsurance Stakeholder Group and Occupational Pensions Stakeholder Group: to help facilitate consultation with stakeholders in areas relevant to the tasks of the Authority, an Insurance and Reinsurance Stakeholder Group and an Occupational Pensions Stakeholder Group shall be established. The Stakeholder Groups shall be consulted on actions concerning regulatory technical standards and implementing technical standards. If actions must be taken urgently and consultation becomes impossible, the Stakeholder Groups shall be informed as soon as possible.

Review clause: by 2 January 2014, and every 3 years thereafter, the Commission shall publish a general report on the experience acquired as a result of the operation of the Authority and the procedures laid down in this Regulation.

ENTRY INTO FORCE: 16/12/2010.

The Authority shall be established on 01/01/2011.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

The Commission presented a report on the operation of the three European Supervisory Authorities (ESAs) the European Banking Authority ([EBA](#)), the European Insurance and Occupational Pensions Authority (EIOPA), and the European Securities and Markets Authority ([ESMA](#)) and the European System of Financial Supervision (ESFS).

The ESAs were established in 2008 following the financial crisis with the aim of strengthening European supervisory arrangements. They started their operations in January 2011. The Commission has assessed in detail the functioning of the ESAs covering the period from their inception to December 2013. Due account was taken of the self-assessment provided by the ESAs, of the [European Parliament Resolution on the ESFS review](#) of March 2014 as well as the studies undertaken by the IMF4 and the European Parliament.

The review showed that in spite of the short reporting period, overall the ESAs have performed well. They have successfully built functioning organisations, have started to deliver on their mandates and have developed their own profiles.

(1) Assessment of the ESAs work : the main achievements concern the following:

- the scope of the mandate of the ESAs is considered sufficiently broad with some room for targeted possible extensions;
- the work undertaken by the ESAs on the development of the single rulebook has contributed significantly towards enhanced regulatory harmonisation and coherence and has improved mutual understanding between supervisors;
- more than 150 technical standards were submitted in form of draft technical standards to the Commission during the review period. EIOPA has carried out extensive preparatory work given the pending negotiations on the [Solvency II/Omnibus II](#) framework and submitted its first technical standard. During the period under review the Commission has approved more than 45 technical standards in total of which only three were sent back to the ESAs for further amendments;
- in the field of supervisions, the ESAs have started conducting peer reviews. Greater use will be made of this tool, including not only thematic peer reviews but also country peer reviews and more systematic follow-up, once work on the regulatory framework has been advanced;

- EBA and EIOPA, and with the establishment of Central Counterparties (CCP) since September 2013 also ESMA, have been actively involved in all aspects of the work of colleges of supervisors and have
- improved their functioning through the provision of guidance and the oversight of agendas and annual action plans. The ESAs contributed to enhance supervisory reporting and disclosure;
- the ESAs have not issued recommendations, or indeed binding decisions (e.g. on breach of law, emergency situations, binding mediation), but have made use of their non-binding mediation powers and moral suasion;
- the ESAs' activities as regards international matters are framed by their underlying mandates;
- the ESAs have actively contributed to monitoring developments in financial markets and to test the resilience of financial institutions as well as of the EU financial system as a whole. The ESAs have taken various measures to promote coordinated action and to facilitate exchange of information. The report mentioned in particular the EIOPA opinion on the low interest rate environment;
- the ESAs have established internal structures on consumer protection issues within their organisations;
- while the shift away from a decision-making process based on consensus to actual voting is a step forward, the predominant role of the representatives of NCAs in the decision making process has given rise to some criticism, the Management Boards of the ESAs are considered to work satisfactorily;
- the two joint bodies of the ESAs, namely the Board of Appeal and the Joint Committee, have proven to be useful mechanisms to ensure consistent views and cross-sectorial cooperation;
- as regards financing, the ESAs' budgets are based on 60% contribution from the NCAs and 40% contribution from the EU budget and are fully subject to applicable financial transparency rules in particular towards the budgetary authorities;
- the overall structure of the ESAs appears appropriate as it takes into account all elements of the financial services sector and facilitates close cooperation between the micro- (ESAs) and the macro-prudential (ESRB) dimension.

(2) Areas for improvement: the review revealed some areas where further improvements are required in the short- and medium term in order to allow the ESAs to fully exploit their mandates.

Areas for improvement in the short term: some of the improvements can be implemented in the short term by the ESAs and the Commission and would not require any change to the legislative framework. This is the case as concerns:

- improving supervisory convergence in order to ensure the consistent implementation and application of EU law, in particular more and better use of peer reviews could be made and more systematic follow-up needs to be ensured where deficiencies have been detected;
- enhancing the transparency of the process for preparing draft technical standards or advising the Commission and ensure, where needed, high quality cost-benefit analysis, including an analysis of impacts on stakeholders and Fundamental Rights, where relevant;
- giving consumer/investor protection tasks a higher priority and make full use of available powers;
- enhancing internal governance: (i) transparency of the work of the stakeholder groups could be strengthened; (ii) the role and influence of ESA staff within preparatory bodies could be reinforced; (iii) the role and visibility of the Joint Committee should be enhanced, e.g. by a dedicated website and systematic publication of its work; (iv) reinforce the authority of the Chairperson and more use could be made of the delegation of specific tasks to the Chairperson.

In the short term, the Commission will take action in the following areas:

- make sure that empowerments for technical standards in future legislative proposals have deadlines relative to the entry into force of the basic legal act;
- pay particular attention to the appropriateness of timelines and to the scope of empowerments for technical standards in draft legislative proposals and during discussions taking place within the legislative process.

Medium term improvements: most of the issues stressed by stakeholders that warrant further attention would imply legislative action to amend the ESA founding Regulations.

Work to assess the possible options should examine the following:

- improve governance of the ESAs to further enhance the capacity of the Board of Supervisors to take swift decisions in the interest of the EU as a whole and strengthen the authority and role of the Chairperson and to amend the composition and mandate of the Management Board in order to confer more permanent and executive functions on it;
- improve the funding arrangements of the ESAs, including the use of alternative sources of funding, ideally abolishing EU and national contributions;
- enable the ESAs to have direct access to data where necessary for the performance of their tasks and in line with the applicable legislation;
- possible extensions of the current mandates should be thoroughly assessed in the light of the subsidiarity principle and against costs and benefits. Potential areas for further tasks to be assigned to the ESAs concerned could include the area of IFRS enforcement, a stronger oversight role on internal model validation, shadow banking, and direct supervision of highly integrated market infrastructure, such as CCPs;
- enhance the mandate in the area of consumer/investor protection in order to better define the respective roles and priorities of the ESAs with a pivotal role assigned to the Joint Committee;
- strengthen the ESAs dispute settlement powers;
- increase the duration of mandates for Stakeholder Groups members;
- assess the possible need for structural changes, including a single seat and extending direct supervision powers to integrated market infrastructures.

European Insurance and Occupational Pensions Authority (EIOPA): establishment

This staff working document accompanies the Commission report on the operation of the three European Supervisory Authorities (ESAs) the European Banking Authority ([EBA](#)), the European Insurance and Occupational Pensions Authority (EIOPA), and the European Securities and Markets Authority ([ESMA](#)) and the European System of Financial Supervision (ESFS).

To recall, the ESAs founding Regulations require the Commission to publish a general report by early 2014 on the experience acquired as a result of the operations of the Authorities and procedures laid down in these Regulations. This report shall be forwarded to the European

Parliament and to the Council together with any accompanying proposals, as appropriate.

Article 81 of the ESAs Regulations sets out a non-exhaustive list of indicators against which the performance of the ESAs shall be assessed.

The present staff working document contains details to support the assessment in the Commission report on the ESAs. It takes the abovementioned indicators thoroughly into account while extending the analysis to further issues, including:

- the process of delivering draft technical standards,
- the application of the supervisory powers contained the ESAs Regulations,
- the functioning and composition of the Joint Committee,
- the Board of Appeal and the stakeholder groups,
- the financing and budgetary process,
- the direct supervision of Credit Rating Agencies (CRAs) by ESMA,
- the potential impact of the establishment of Banking Union on the overall ESFS and the EBA in particular.
