Final act
Decision 2011/901 OJ L 348 31.12.2011, p. 0001 Summary

EU/USA Agreement: promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications

PURPOSE: to conclude and Agreement on the promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications between the United States of America (US) and the European Community (EC) and its Member States.

PROPOSED ACT: Council Decision.

BACKGROUND: on the basis of a Commission proposal of 14 July 1999, the Council authorised the Commission on 30 September 1999 to open negotiation with the US for the conclusion of an agreement concerning the development of a Civil Global Navigation System. These negotiations were successfully completed.

The Agreement was signed in Dromoland Castle, Ireland, on 26 June 2004 and entered into application provisionally on 1 November 2008. Member States have completed their respective internal procedures related to the entry into force of the agreement.

IMPACT ASSESSMENT: no impact assessment was undertaken.

LEGAL BASIS: Articles 171(3) 172 in conjunction with Article 218 (6) (a) of the Treaty on the Functioning of the EU.

CONTENT: this proposal involves the conclusion of the e Agreement on the promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications between the United States of America, of the one part, and the European Community and its Member States, of the other part. Bulgaria and Romania are to become parties to the agreement by the conclusion of a

protocol in accordance with Art 6(2) of the Act concerning the conditions of accession of the Republic of Bulgaria and Romania and the adjustments to the treaties on which the European Union is founded.

Objectives: the objective is to provide a framework for cooperation between the Parties in the promotion, provision and use of civil GPS and GALILEO navigation and timing signals and services, value-added services, augmentations, and global navigation and timing goods. The Parties intend to work together, both bilaterally and in multilateral fora, as provided in the text, to promote and facilitate the use of these signals, services, and equipment for peaceful civil, commercial, and scientific uses, consistent with and in furtherance of mutual security interests. The Agreement is intended to complement and facilitate agreements in force, or which may be negotiated in the future, between the Parties related to the design and implementation of civil satellite-based navigation and timing signals and services, augmentations, or value-added services.

Nothing in the Agreement shall supersede, modify or derogate from standards, procedures, rules, regulations and recommended practices adopted in ICAO, or IMO, or under the Marrakech Agreement Establishing the World Trade Organisation.

Interoperability and Radio Frequency Compatibility: the Parties agree that GPS and GALILEO shall be radio frequency compatible and, to the greatest extent possible, interoperable at the non-military user level. In order to achieve this interoperability and facilitate the joint use of the two systems, the Parties agree to realise their geodetic coordinate reference frames as closely as possible to the International Terrestrial Reference System. The Parties also agree to transmit the time offsets between GALILEO and GPS system times in the navigation messages of their respective services.

The radio frequency compatibility and interoperability working group shall continue work already underway with a view toward achieving, inter alia:

- radio frequency compatibility in the modernisation or evolution of either system; (The Parties need to assess further the radiofrequency compatibility of GALILEO and GPS III).
- enhanced signal availability and reliability through complementary system architectures for the benefit of users worldwide;
- interoperability at the non-military user level.

The Council is requested to adopt the following proposal for a Decision on the conclusion of the agreement on behalf of the European Union after the approval of the European Parliament.

BUDGETARY IMPLICATION: the proposal has no implications for the EU budget.

EU/USA Agreement: promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications

PURPOSE: to conclude the Agreement on the promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications between the EC and its Member States, and the United States of America.

PROPOSED ACT: Council Decision.

BACKGROUND: on 30 September 1999, the Council authorised the Commission to open negotiations with the USA for the conclusion of an agreement concerning the development of a Civil Global Navigation System. In accordance with the decision of the Council of 22 June 2004, the Agreement on the promotion, provision and use of GALILEO and GPS satellite based navigation systems and related applications was signed in Dromoland Castle, Ireland, on 26 June 2004 and has been provisionally applied since 1 November 2008, pending its entry into force.

It is now appropriate to approve this Agreement on behalf of the EU.

IMPACT ASSESSMENT: no impact assessment was carried out.

LEGAL BASIS: Article 171 and Article 172, first subparagraph, in conjunction with Article 218 (6) (a) and the first subparagraph of Article 218(8) of the Treaty on the Functioning of the European Union.

CONTENT: this draft Decision aims to conclude the Agreement on the promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications between the EC and its Member States, and the United States of America.

The text of the Agreement is attached to the present Decision. For further details on the content of the Agreement please refer to summary of the previous initial legislative document dated 17/03/2011.

The objective of the Agreement is to provide a framework for cooperation between the Parties in the promotion, provision and use of civil GPS and GALILEO navigation and timing signals and services, value-added services, augmentations, and global navigation and timing goods.

The Parties intend to work together, both bilaterally and in multilateral fora, to promote and facilitate the use of these signals, services, and equipment for peaceful civil, commercial, and scientific uses, consistent with and in furtherance of mutual security interests. The Agreement is intended to complement and facilitate agreements in force, or which may be negotiated in the future, between the Parties related to the design and implementation of civil satellite-based navigation and timing signals and services, augmentations, or value-added services.

BUDGETARY IMPLICATIONS: this proposal has no implications for the EU budget.

EU/USA Agreement: promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications

The Committee on Industry, Research and Energy adopted the report drafted by Herbert REUL (EPP, DE) in which it recommends the European Parliament to give its consent to the conclusion of the Agreement on the promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications between the European Community and its Member States, of the one part, and the

United States of America, of the other part.

EU/USA Agreement: promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications

The European Parliament adopted a legislative resolution on draft Council decision on the conclusion of the Agreement on the promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications between the European Community and its Member States, of the one part, and the United States of America, of the other part.

Parliament gives its consent to the conclusion of the Agreement.

EU/USA Agreement: promotion, provision and use of GALILEO and GPS satellite-based navigation systems and related applications

PURPOSE: to conclude the Agreement on the promotion, provision and use of GALILEO and GPS satellite-based navigation systems between the United States of America (US) and the European Community (EC) and its Member States.

NON-LEGISLATIVE ACT: Council Decision 2011/901/EU on the conclusion of the Agreement on the promotion, provision and use of Galileo and GPS satellite-based navigation systems and related applications between the European Community and its Member States, of the one part, and the United States of America, of the other part.

CONTENT: the Council authorised the conclusion of this agreement with the US providing a framework for cooperation in the promotion, provision and use of civil GPS and GALILEO satellite-based navigation systems and related applications. This decision follows the completion of Member States' internal procedures and the consent given by the European Parliament.

The agreement, signed in June 2004 in Dromoland Castle in Ireland, and provisionally applied since November 2008, aims at ensuring interoperability and radio frequency compatibility, access to signals, consultation before the establishment of standards and certification, licensing or technical requirements, and non-discrimination as regards trade in the goods and services concerned.

The main provisions are as follows:

Objectives: the objective is to provide a framework for cooperation between the Parties in the promotion, provision and use of civil GPS and GALILEO navigation and timing signals and services, value-added services, augmentations, and global navigation and timing goods. The Parties intend to work together, both bilaterally and in multilateral fora, as provided in the text, to promote and facilitate the use of these signals, services, and equipment for peaceful civil, commercial, and scientific uses, consistent with and in furtherance of mutual security interests. The Agreement is intended to complement and facilitate agreements in force, or which may be negotiated in the future, between the Parties related to the design and implementation of civil satellite-based navigation and timing signals and services, augmentations, or value-added services.

Nothing in the Agreement shall supersede, modify or derogate from standards, procedures, rules, regulations and recommended practices adopted in ICAO, or IMO, or under the Marrakech Agreement Establishing the World Trade Organisation.

Interoperability and Radio Frequency Compatibility: the Parties agree that GPS and GALILEO shall be radio frequency compatible and, to the greatest extent possible, interoperable at the non-military user level. In order to achieve this interoperability and facilitate the joint use of the two systems, the Parties agree to realise their geodetic coordinate reference frames as closely as possible to the International Terrestrial Reference System. The Parties also agree to transmit the time offsets between GALILEO and GPS system times in the navigation messages of their respective services.

The radio frequency compatibility and interoperability working group shall continue work already underway with a view toward achieving, inter alia:

- radio frequency compatibility in the modernisation or evolution of either system (the Parties need to assess further the radiofrequency compatibility of GALILEO and GPS III);
- enhanced signal availability and reliability through complementary system architectures for the benefit of users worldwide;
- interoperability at the non-military user level.

ENTRY INTO FORCE : 12/12/2011.
