#### Final act

[Decision 2014/241](#)  
[OJ L 128 30.04.2014, p. 0045](#) Summary

PURPOSE: to requiring Member States to ratify or to accede to the Hong Kong International Convention of 2009 for the Safe and Environmentally Sound Recycling of Ships, in the interests of the European Union.

PROPOSED ACT: Council Decision.

BACKGROUND: current legislation at international and European levels has proven ineffective to put an end to environmentally unsound and unsafe practices in dismantling ships. The current widespread non-compliance is linked to : (i) the lack of recycling capacity available within the OECD in particular for the largest commercial ships ; (ii) the fierce and unfair competition between the substandard facilities and other facilities with higher technical standards which are only able to occupy market niches for special types of ships like small ships and government vessels including warships or the fleet of committed shipowners; (iii) the fact that the current legislation is not adapted to the specificities of ships and international shipping.

At the end of their operating life, most of the large commercial seagoing vessels are still dismantled in substandard facilities located in Asia (India, Pakistan and Bangladesh), usually through "beaching" method and with significant environmental and health impacts. The situation is expected to worsen since large numbers of ships are expected to be sent for dismantling in the coming years.

The Hong Kong Convention for the Safe and Sound Recycling of Ships was adopted in May 2009 by the International Maritime Organisation. It needs to be ratified by a sufficient number of both large flag and recycling States in order to enter into force and start producing effects.

The environmentally sound management of ship dismantling is a priority for the European Union and the early implementation of the Convention is one of the key actions proposed in the [Communication of the Commission 'An EU Strategy for better ship dismantling'](#).

The proposal is closely linked to the [proposal for a regulation](#) of the European Parliament and of the Council on ship recycling to implement the Hong Kong International Convention.

IMPACT ASSESSMENT: no impact assessment has been undertaken.

LEGAL BASIS: Article 192(1), in conjunction with Article 218(6)(a)(v) and the first subparagraph of Article 218(8) TFEU.

CONTENT: the Hong Kong Convention aims at ensuring that ships, when being dismantled after reaching the end of their operational live, do not pose any unnecessary risks to human health and safety and to the environment. The Convention addresses the issues around ship dismantling in their entirety as well as concerns raised about the working and environmental conditions at many of the ship dismantling locations around the world.

So far none of the Member States has ratified the Convention or acceded to it and only three Member States have signed it. Some provisions of the Convention fall within the exclusive competence of the Union as regards ship recycling. The Union cannot ratify the Convention, as only States can be parties thereto.

Accordingly, it is proposed that the Council require Member States to ratify the Convention or to accede to it in the interests of the Union.

Ratification of the Convention or accession to it by Member States would carry weight in the international arena and would speed up the entry into force of the Convention.

BUDGETARY IMPLICATIONS: the proposal has no implications for the EU budget.

---

## Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009: ratification or accession by Member States

---

PURPOSE: to authorise Member States to ratify or to accede to the Hong Kong International Convention of 2009 for the Safe and Environmentally Sound Recycling of Ships, in the interests of the European Union.

PROPOSED ACT: Council Decision.

ROLE OF THE EUROPEAN PARLIAMENT: Council may adopt the act only if Parliament has given its consent to the act.

BACKGROUND: the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009, was adopted on 15 May 2009 under the auspices of the International Maritime Organisation (IMO). It covers the design, construction, operation and preparation of ships so as to facilitate safe and environmentally sound recycling without compromising ship safety and operational efficiency.

The Convention enters into force 24 months after the date of ratification by at least 15 States representing a combined merchant fleet of at least 40 per cent of the gross tonnage of the world's merchant shipping and whose combined maximum annual ship recycling volume during the preceding 10 years constitutes not less than three per cent of the gross tonnage of the combined merchant shipping of the same States.

In its conclusions of 21 October 2009, the Council strongly encouraged the Member States to ratify the Convention as a matter of priority so as to facilitate its entry into force as early as possible and to generate a real and effective change on the ground.

The Union cannot accede to the Convention, as only States can be parties thereto. Thus, the Council should authorise Member States having ships flying their flag or registered under their flag which fall within the scope of the Convention to ratify or accede to it. This is the aim of this proposal.

LEGAL BASIS: Article 192(1), in conjunction with Article 218(6)(a)(v) and the first subparagraph of Article 218(8) of the Treaty on the Functioning of the European Union (TFEU).

CONTENT: with this proposed Decision, it is proposed to invite the Council to authorise the Member States to ratify or accede to, for the parts falling under the exclusive competence of the Union, the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009.

Aims of the Convention: the Hong Kong Convention aims at ensuring that ships, when being dismantled after reaching the end of their operational live, do not pose any unnecessary risks to human health and safety and to the environment. It addresses the issues around ship

dismantling in their entirety as well as concerns raised about the working and environmental conditions at many of the ship dismantling locations around the world.

For further details of the main provisions of the Convention, please refer to the summary of the initial legislative proposal dated 23/03/2012.

Entry into force: Member States which have ratified or acceded to the Convention shall notify the Commission thereof within 6 months of the date of deposit of their instruments of ratification or accession with the Secretary-General of the IMO.

The Council will review the progress of the ratification by 31 December 2018.

## Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009: ratification or accession by Member States

---

The Committee on the Environment, Public Health and Food Safety adopted the report by Carl SCHLYTER (Greens/EFA, SE) on the draft Council decision concerning the ratification of, or the accession to, the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009, by the Member States in the interests of the European Union.

Given that the Convention is a step at global level to move towards a safer and more environmentally sound recycling of non-EU ships, Members called on the European Parliament to give its consent the Council Decision allowing Member States to ratify or accede to the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009, in the interests of the European Union.

## Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009: ratification or accession by Member States

---

The European Parliament adopted by 439 votes to 41, with 22 abstentions, a legislative resolution on the draft Council decision concerning the ratification of, or the accession to, the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009, by the Member States in the interests of the European Union.

Parliament gave its consent to the draft Council decision.

## Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009: ratification or accession by Member States

---

**PURPOSE:** to authorise Member States to ratify or to accede to the Hong Kong International Convention of 2009 for the Safe and Environmentally Sound Recycling of Ships.

**NON-LEGISLATIVE ACT:** Council Decision 2014/241/EU concerning the ratification of, or the accession to, the Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009, by the Member States in the interests of the European Union.

**BACKGROUND:** current legislation at international and European levels has proven ineffective to put an end to environmentally unsound and unsafe practices in dismantling ships. This widespread non-compliance is due, among other things, to the fact that the current legislation is not adapted to the specificities of ships and international shipping.

At the end of their operating life, most of the large commercial seagoing vessels are still dismantled in substandard facilities located in Asia (India, Pakistan and Bangladesh), usually through "beaching" method and with significant environmental and health impacts. The situation is expected to worsen since large numbers of ships are expected to be sent for dismantling in the coming years.

To address this situation, in 2004, the Parties to the Basel Convention called on the International Maritime Organisation (IMO) to draw up strict requirements in regard to the recycling of ships.

The Hong Kong Convention for the Safe and Sound Recycling of Ships was adopted in May 2009 by the International Maritime Organisation. However, to enter into force, the convention needs to be ratified by at least 15 States representing a combined merchant fleet of at least 40 per cent of the gross tonnage of the world's merchant shipping.

The Union cannot accede to the Convention, as only States can be parties thereto. Thus the Council authorises Member States having ships flying their flag or registered under their flag which fall within the scope of the Convention to ratify or accede to it.

**Objectives of the Convention:** the Convention covers the design, construction, operation and preparation of ships so as to facilitate safe and environmentally sound recycling without compromising ship safety and operational efficiency. It also covers the operation of ship recycling facilities in a safe and environmentally sound manner, and the establishment of an appropriate enforcement mechanism for ship recycling.

**Ratification:** Member States which have ratified or acceded to the Convention shall notify the Commission thereof. The Council will review the progress of the ratification by 31 December 2018.
