### Final act

[Decision 2018/599](#)  
[OJ L 101 20.04.2018, p. 0001](#) Summary

## Measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel

**PURPOSE:** to review the rules on the cancellation of commitments under the research programme of the Research Fund for Coal and Steel (RFCS) and the rules on amounts recovered under the research programme of the Research Fund for Coal and Steel (RFCS).

**PROPOSED ACT:** Council Decision.

**ROLE OF THE EUROPEAN PARLIAMENT:** Council may adopt the act only if Parliament has given its consent to the act.

**BACKGROUND:** the Treaty establishing the European Coal and Steel Community (ECSC) expired on 23 July 2002.

The Protocol annexed to the Treaty establishing the European Community, transferred the assets and liabilities of the ECSC to the European Community and allocated the net worth of these assets to research in the sectors related to coal and steel industry. The Protocol also assigned the revenue from these assets for research, outside the research framework programme, in the sectors related to the coal and steel industry.

The revenues assigned to the funding of research projects for Coal and Steel are decreasing at a substantial rate from one year to the other. The budgetary envelope of the RFCS programme has decreased from EUR 46 million in 2017 based on 2015 ECSC in liquidation's revenues to EUR 27 million in 2018 based on 2016 ECSC in liquidation's revenues and the amount is expected to be even lower for 2019 (between

EUR 14 million and EUR 18 million).

In order to maintain an acceptable level of funding for research projects in the coal and steel sector for a certain period, pending a change in monetary policy and an increase in asset returns on public bond markets, the Commission suggests the recycling of unused appropriations put at the disposal of the research programme of the Research Fund for Coal and Steel (RFCS).

CONTENT: the proposed revision is limited to two paragraphs of Article 4 of the [Council Decision 2003/76/EC](#) and aims at applying the same treatment (automatic carry-over to the next year) for both categories of unused funds: appropriations not committed at year-end and cancellations of commitments.

According to the Commission, the adoption of the proposed revision:

- will authorise the recycling of all the de-commitments (including the amounts recovered) made in the RFCS research programme since 2003 which have been returned to the assets of the ECSC in liquidation and represent a possible complementary funding for the RFCS research programme of EUR 40.3 million;
- will provide additional funding of nearly EUR 5 million per year (average flow of annual de-commitments over the three past years in RFCS research programme).

Concretely, the rapid adoption of the proposal by the first Semester of 2018 would allow the commission to top up the expected envelope of the RFCS programme for 2018 (EUR 27 million) to reach an amount of EUR 40 million for the next annual call for proposals.

## Measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel

---

PURPOSE: to revise the rules on the cancellation of commitments made under the research programme of the Research Fund for Coal and Steel (RFCS) and the rules on amounts recovered under the research programme of the Research Fund for Coal and Steel (RFCS).

PROPOSED ACT: Council Decision.

ROLE OF THE EUROPEAN PARLIAMENT: Council may adopt the act only if Parliament has given its consent to the act.

BACKGROUND: Protocol No 37 on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel has transferred all the assets and liabilities of the European Coal and Steel Community (ECSC) to the European Community and allocated the net worth of the assets and liabilities to research in sectors related to the coal and steel industry.

The Protocol has also assigned the revenues from those assets, referred to as Research Fund for Coal and Steel, to research in sectors related to the coal and steel industry.

[Decision 2003/76/EC](#) lays down the rules necessary for implementing Protocol No 37.

In view of the exceptional decrease, due to the low-interest-rate environment on the capital markets in recent years, in the revenue stemming from the assets of the ECSC in liquidation dedicated to research in the sectors related to the coal and steel industry, it is necessary to revise the rules on the cancellation of commitments made under the research programme of the Research Fund for Coal and Steel. It is also necessary to revise the rules on the amounts recovered under the programme.

CONTENT: the draft amendment to Council Decision 2003/76/EC provides that:

- unused revenue and appropriations deriving from this revenue still available on 31 December in any given year, as well as amounts recovered, shall be carried over automatically to the following year. Those appropriations may not be transferred to other budget items.
- budgetary appropriations corresponding to cancellations of commitments shall automatically lapse at the end of each financial year. Provisions for commitments released as a result of the cancellations shall be made available to the Research Fund for Coal and Steel.

Amounts corresponding to cancellations of commitments that have occurred since 24 July 2002 should also be made available to the Research Fund for Coal and Steel.

## Measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel

---

The Committee on Budgets adopted the report by Jean ARTHUIS (ADLE, FR) on the draft Council decision amending Council Decision 2003/76/EC establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel.

The committee recommended that the European Parliament give its approval to the conclusion of the Agreement.

As indicated in the explanatory memorandum accompanying the report, the Research Fund for Coal and Steel (RFCS), established upon the expiry of the Treaty establishing the European Coal and Steel Community (ECSC), serves to finance research in the sectors concerned, 72.8% being earmarked for steel and 27.2% for coal.

The aim of the Commissions proposal is to allow all the de-commitments made in the RFCS research programme since 2003 to be used. The Commission estimates the potential gains from this recycling at EUR 40.3 million. The adoption of the proposal would thus enable the Commission to increase the RFCS budget for 2018 to EUR 40 million and to use the remainder of the appropriations for the 2019 budget.

The EU is committed to reducing its greenhouse gas emissions by 40% (taking 1990 as the base year) by 2030 and complying with the Paris Agreement adopted at COP 21.

The explanatory memorandum mentions in this respect some projects illustrating the positive contribution to the environment of co-financing from the RFCS.

Furthermore, Parliament fully supports the aim of promoting clean and competitive European steel. A qualitative leap is necessary in order to establish a practical project to manufacture steel without any CO<sub>2</sub> emissions by 2025. In this context, Parliament will ensure that a substantial amount is earmarked for this initiative under the new Framework Programme for Research and Innovation (FP9).

In conclusion, the rapporteur believes that the revision of Council Decision 2003/76/EC, which has no budgetary impact, would make it possible not only to bring the RFCS into line with the Financial Regulation but also to find the money necessary for the financing of innovative projects. On average the fund allocates EUR 55 million per annum to research projects. Without this money, potentially only half as many projects would be funded.

## Measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel

---

The European Parliament adopted by 538 votes to 89, with 60 abstentions, following a special legislative procedure (Parliament's consent), a legislative resolution on the draft Council decision amending Council Decision 2003/76/EC establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel.

The European Parliament gave its consent to the draft Council Decision which aims to authorise the use of all de-commitments made under the "Research Fund for Coal and Steel" (RFCS) programme since 2003.

## Measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel

---

**PURPOSE:** to review the rules on the cancellation of commitments under the research programme of the Research Fund for Coal and Steel (RFCS) and the rules on amounts recovered under the research programme of the Research Fund for Coal and Steel (RFCS).

**LEGISLATIVE ACT:** Council Decision (EU) 2018/599 amending Decision 2003/76/EC establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel.

**CONTENT:** the Research Fund for Coal and Steel (RFCS), established following the expiry of the Treaty establishing the European Coal and Steel Community (ECSC), is dedicated to financing research activities in these sectors.

In view of the decrease in revenue generated by the assets of the ECSC in liquidation due to the low interest rates on the capital markets in recent years and devoted to research in the sectors related to the coal and steel industry, this Decision amending [Council Decision 2003/76/EC](#) authorises the recycling of unused appropriations made available to the research programme of the RFCS.

This shall allow an acceptable level of funding for coal and steel research projects to be maintained for a certain period pending a change in monetary policy and an increase in asset returns on public bond markets.

In concrete terms, the amending decision provides that:

- unused revenue and appropriations deriving from this revenue still available on 31 December in any given year, as well as amounts recovered, shall be carried over automatically to the following year. Those appropriations may not be transferred to other budget items;
- budgetary appropriations corresponding to cancellations of commitments shall automatically lapse at the end of each financial year. Provisions for commitments released as a result of the cancellations shall be made available to the Research Fund for Coal and Steel.

Under the Decision, the amount corresponding to cancellations of commitments made since 24 July 2002 shall be made available to the Research Fund for Coal and Steel on 10 May 2018.

**ENTRY INTO FORCE:** 10.5.2018.
