Notification under the Carbon Offsetting and Reduction Scheme for International Aviation (CORSA)

PURPOSE: to amending Directive 2003/87/EC (EU ETS) to phase out free emission allowances for aviation and align with the global Carbon Offsetting and Reduction Scheme for International Aviation (CORSA).

PROPOSED ACT: Decision of the European Parliament and of the Council.

ROLE OF THE EUROPEAN PARLIAMENT: the European Parliament decides in accordance with the ordinary legislative procedure and on an equal footing with the Council.

BACKGROUND: Directive 2003/87/EC established an EU emissions trading system (EU ETS). It is aimed at tackling climate change by reducing greenhouse gas (GHG) emissions in a cost-effective and economically efficient way.

The European Green Deal launched a new growth strategy for the EU that aims to transform the EU into a fair and prosperous society, with a modern, resource-efficient and competitive economy. The [European Climate Law](#) has made the EU's climate neutrality target by 2050 legally binding.

The Commission has presented a complementary and interconnected set of proposals as part of the 2030 Climate and Energy Fit for 55 package to achieve the greenhouse gas emission reduction target of at least 55% compared to 1990. This Fit for 55 legislative package is the most comprehensive building block in the efforts to implement the ambitious new 2030 climate target, and all economic sectors and policies will need to make their contribution.

The Fit for 55 package, the Next Generation EU and the Multiannual Financial Framework for 2021-2027 will help to achieve the twin green and digital transitions that Europe is aiming for.

As part of this package, this proposal introduces an amendment to aviation rules in the Emissions Trading System of the European Union (EU ETS) to implement Member States notification to EU-based airlines of the offsetting for the year 2021 under the Carbon Offsetting and Reduction Scheme for International Aviation (CORSA) of the International Civil Aviation Organisation (ICAO).

CONTENT: with this proposal decision, the Commission seeks to phase out free emission allowances for aviation and align with the global Carbon Offsetting and Reduction Scheme for International Aviation (CORSA) in a way that is consistent with the EU's 2030 climate objectives.

The EU ETS Directive would thus allow the CORSA scheme to be applied to emissions from EU-based airlines for flights to and from countries outside the EEA.

The objective is to implement this notification in a manner that minimises the administrative burden of national authorities and airline operators, and provides legal certainty as regards CORSA offsetting by airlines based in Member States.

Due to the COVID-19 pandemic, aviation CO₂ emissions in the EU ETS have decreased by 64% in 2020 compared to 2019. Aviation emissions are unlikely to exceed their 2019 levels in 2021. Therefore, the additional compensation for aircraft operators is expected to be zero for the year 2021.

However, the proposed decision provides that Member States should implement the CORSA scheme by notifying aircraft operators based in those Member States of their compensation for the year 2021 by 30 November 2022.

Notification under the Carbon Offsetting and Reduction Scheme for International Aviation (CORSA)

The Committee on the Environment, Public Health and Food Safety adopted the report by Sun?ana GLAVAK (EPP, HR) on the proposal for a decision of the European Parliament and of the Council amending Directive 2003/87/EC as regards the notification of offsetting in respect of a global market-based measure for aircraft operators based in the Union.

The proposal for a decision introduces an amendment to aviation rules in the Emissions Trading System of the European Union (EU ETS) to implement Member States notification to EU-based airlines of the offsetting for the year 2021 under the Carbon Offsetting and Reduction Scheme for International Aviation (CORSA) of the International Civil Aviation Organisation (ICAO).

Members stipulated that this decision is intended to be a temporary measure that only applies pending the entry into force of Directive of the European Parliament and of the Council amending Directive 2003/87/EC as regards aviation's contribution to the Union's economy-wide emission reduction target.

Members introduced a reference to the European Parliament's resolution of 21 October 2021 on the United Nations Climate Change Conference 2021 in Glasgow (UK) (COP26) in which the European Parliament expressed concern about the slow progress in the International Civil Aviation Organisation (ICAO) in tackling emissions from international aviation and reaffirmed, in this context, the need to regulate this sector under the EU Emissions Trading Scheme (EU ETS).

Moreover, the European Parliament called on the Commission and the Member States to do their utmost to strengthen the carbon offset and reduction scheme for international aviation (CORSA) and to support the adoption by ICAO of a long-term emission reduction target for the sector, while preserving the Union's legislative autonomy in the implementation of the EU ETS Directive.

Notification under the Carbon Offsetting and Reduction Scheme for International Aviation (CORSA)

The European Parliament adopted by 547 votes to 44, with 45 abstentions, amendments of the European Parliament to the proposal for a

decision of the European Parliament and of the Council amending Directive 2003/87/EC as regards the notification of offsetting in respect of a global market-based measure for aircraft operators based in the Union.

The matter was referred to the committee responsible for inter-institutional negotiations.

The proposal for a decision introduces an amendment to aviation rules in the Emissions Trading System of the European Union (EU ETS) to implement Member States notification to EU-based airlines of the offsetting for the year 2021 under the Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA) of the International Civil Aviation Organisation (ICAO).

ICAO CORSIA is an offset mechanism where countries should have airlines based in those countries offset CO2 emissions that exceed the relevant baseline by international credits.

Members introduced a reference to the Paris Agreement in the recitals, the European Parliament [resolution](#) of 28 November 2019 on the climate and environmental emergency, as well as to the [resolution](#) of 21 October 2021 on the United Nations Climate Change Conference 2021 in Glasgow (COP26), in which the European Parliament expressed its concern about the slow progress within the International Civil Aviation Organisation (ICAO) in tackling emissions from international aviation and reaffirmed, in this context, the need to regulate this sector under the EU Emissions Trading Scheme (EU ETS).

Furthermore, the European Parliament called on the Commission and the Member States to do their utmost to strengthen the carbon offset and reduction scheme for international aviation (CORSIA) and to support the adoption by ICAO of a long-term emission reduction target for the sector, while preserving the Union's legislative autonomy in the implementation of the EU ETS Directive.

This Decision would be designed as a temporary measure that applies only pending the entry into force of the Directive of the European Parliament and of the Council amending Directive 2003/87/EC as regards the contribution of aviation to the Union's economy-wide emission reduction target and implementing a global market mechanism as appropriate.
