Final act

[Decision 2024/1254](#)
OJ OJ L 30.04.2024 Summary

Amending certain road transport and aviation Directives as regards certain reporting requirements

PURPOSE: to amend Directives 2009/12/EC, 2009/33/EC and (EU) 2022/1999 of the European Parliament and of the Council and Council Directive 96/67/EC as regards certain reporting requirements in the fields of road transport and aviation.

PROPOSED ACT: Decision of the European Parliament and of the Council.

ROLE OF THE EUROPEAN PARLIAMENT: the European Parliament decides in accordance with the ordinary legislative procedure and on an equal footing with the Council.

BACKGROUND: reporting requirements play a key role in ensuring proper monitoring and correct enforcement of legislation. Reporting requirements can however also impose disproportionate burdens on stakeholders, particularly affecting SMEs and micro-companies, also given organisational and technological developments that call for original reporting requirements to be adjusted. Their cumulation over time can result in redundant, duplicating or obsolete obligations, inefficient frequency and timing, or inadequate methods of collection.

Streamlining reporting obligations and reducing administrative burdens is therefore a priority.

Directives 2009/12/EC on airport charges, 2009/33/EC on the promotion of clean and energy-efficient road transport vehicles and (EU) 2022/1999 on uniform procedures for checks on the transport of dangerous goods by road of the European Parliament and of the Council, and Council Directive 96/67/EC on access to the groundhandling market at Community airports contain a number of reporting requirements in the fields of road transport and aviation, which should therefore be simplified.

In line with the Commissions Communication on [Long-term competitiveness of the EU: looking beyond 2030](#), this proposal is part of a first package of measures to rationalise reporting requirements. This is a step in a process looking comprehensively at existing reporting requirements, with a view to assess their continued relevance and to make them more efficient.

CONTENT: the proposal concerns limited and targeted changes to four Directives with a view to streamlining the reporting requirements.

The proposal aims to simplify obligations in the transport policy area, in particular road and air transport. It will streamline reporting requirements through a combination of measures, including reducing the frequency of these obligations and removing some of their elements.

The reporting requirements apply to public authorities and concern the following:

- Member States would present to the Commission their report on clean vehicles procured under Directive 2009/33/EC of the European Parliament and of the Council every five years instead of every three years, and the Commission would present its report to the European Parliament and the Council at the same frequency;
- the obligation for Member States under Directive (EC) 2022/1999 of the European Parliament and of the Council to report to the Commission data relating to the transport of dangerous good would be simplified. In addition, they would have to report this data every two years, instead of every year. The Commission would report to the Parliament and Council every four years, instead of three, therefore following up on two sets of reports received from Member States;
- the obligation for Member States to inform the Commission of the list of airports subject to the obligation to apply the rules relating to ground handling services, under Council Directive 96/67/EC, would be removed, as would the obligation on the Commission to publish this list;
- the obligation from Member States to yearly report the list of airports falling under the scope of this Directive to the Commission and for the Commission to publish that list is deleted.

Amending certain road transport and aviation Directives as regards certain reporting requirements

The Committee on Transport and Tourism adopted the report by Jan Christoph OETJEN (Renew, DE) on the proposal for a decision of the European Parliament and of the Council amending Directives 2009/12/EC, 2009/33/EC and (EU) 2022/1999 of the European Parliament and of the Council and Council Directive 96/67/EC as regards certain reporting requirements in the fields of road transport and aviation.

The committee responsible recommended that the European Parliament's position adopted at first reading under the ordinary legislative procedure should amend the proposal as follows:

It suggests that the European Parliament approve the Commission's proposal subject to an amendment stipulating that the reports submitted to the Commission every five years on the implementation of Directive 2009/33/EC on the promotion of clean and energy-efficient road transport vehicles should contain information on the measures taken to implement the Directive, on future implementation activities and any other information that the Member State considers relevant. These reports should also mention the number and categories of vehicles covered by the contracts referred to in Article 3(1) of the Directive, on the basis of data provided by the Commission.

The Decision should enter into force on the twentieth day following that of its publication in the Official Journal of the European Union.

Amending certain road transport and aviation Directives as regards certain reporting requirements

The European Parliament adopted by 609 votes to 3, with 8 abstentions, a legislative resolution on the proposal for a decision of the European Parliament and of the Council amending Directives 2009/12/EC, 2009/33/EC and (EU) 2022/1999 of the European Parliament and of the Council and Council Directive 96/67/EC as regards certain reporting requirements in the fields of road transport and aviation.

The European Parliament adopted its position at first reading under the ordinary legislative procedure.

Members support the European Commission's proposal to make limited and targeted changes to four directives in order to streamline reporting obligations.

An amendment stipulated that the reports submitted to the Commission every five years on the implementation of Directive 2009/33/EC on the promotion of clean and energy-efficient road transport vehicles should contain information on the measures taken to implement the Directive, on future implementation activities and any other information that the Member State considers relevant. These reports should also mention the number and categories of vehicles covered by the contracts referred to in Article 3(1) of the Directive, on the basis of data provided by the Commission.

This Decision should enter into force on the twentieth day following that of its publication in the Official Journal of the European Union.

Amending certain road transport and aviation Directives as regards certain reporting requirements

PURPOSE: to make limited and targeted amendments to four directives with a view to streamlining certain reporting requirements in the road transport and aviation sectors.

LEGISLATIVE ACT: Decision (EU) 2024/1254 of the European Parliament and of the Council amending Directives 2009/12/EC, 2009/33/EC and (EU) 2022/1999 of the European Parliament and of the Council and Council Directive 96/67/EC as regards certain reporting requirements in the fields of road transport and aviation.

CONTENT: reporting requirements play a key role in ensuring proper monitoring and correct enforcement of legislation. However, it is important to streamline such requirements, in order to ensure that they fulfil the purpose for which they were intended and to limit the administrative burden.

Directive 2009/12/EC of the European Parliament and of the Council on airport charges, Directive 2009/33/EC of the European Parliament and of the Council on the promotion of clean and energy-efficient road transport vehicles, Directive (EU) 2022/1999 of the European Parliament and of the Council on uniform procedures for checks on the transport of dangerous goods by road, as well as Council Directive 96/67/EC on access to the ground handling market at Community airports, lay down several reporting requirements in the fields of road transport and aviation.

This decision provides for limited and targeted amendments to these four Directives. It simplifies the requirements in the policy area of transport, in particular road and air transport, and streamlines the reporting requirements through a combination of measures, including reducing the frequency of these requirements and deleting some of their elements.

ENTRY INTO FORCE: 20.5.2024.
