Final act

[Decision 1994/919](#)
[OJ L 361 31.12.1994, p. 0132](#) Summary

Research RTD, specific programme: Joint research centre JRC for the EAEC 1995-1998

The purpose of this proposal for a decision is to establish a specific RTD programme to be carried out by the Joint Research Centre (JRC) between 1995 and 1998. Provision has been made for the JRC to help implement the first action under the framework programme in the following fields: . safety of nuclear fission: research into controlling fissile materials, the safety of the fuel cycle and reactor safety; . controlled thermonuclear fusion: concentrated research into safety and environmental aspects and into activities within the framework of the ITER agreement (materials and remote handling). Projects will include institutional research activities and institutional scientific and technical support activities. The amount deemed necessary to implement the activities of the JRC is ECU 300 million.?

Research RTD, specific programme: Joint research centre JRC for the EAEC 1995-1998

The committee adopted the report by Mr DESAMA ?

Research RTD, specific programme: Joint research centre JRC for the EAEC 1995-1998

Specific RTD programme to be implemented by the JRC. The EP supported the committee's proposals. Through its amendments, the EP recommended that the amount deemed necessary for the implementation of the programme (ECU 300 million) should be increased on the basis of a joint evaluation/decision by the EP and the Council. It stated that progress on the implementation of the programme should be monitored permanently and systematically and that the EP should be kept informed of the results; it emphasised the fact that the activities of the JRC should also be based on ecologically responsible development. The Commission should undertake the tasks incumbent upon it in the area of nuclear safety on the basis of the technical expertise of the JRC. The EP stressed that the JRC should assist the Community, in the context of the Tacis programme, in working with the competent authorities of the New Independent States to set up a system of safeguards to eliminate any potential source of unlawful trade in, or misappropriation of, nuclear materials. The EP called for greater cooperation between laboratories/research institutes/industry and underlined that the JRC could make an effective contribution to the training and mobility of researchers. ?

Research RTD, specific programme: Joint research centre JRC for the EAEC 1995-1998

The Council decision adopted, for the period 1995-1998, a specific research and technological development programme to be implemented for the Joint Research Centre (JRC) for Euratom. This programme covered the work to be led by the JRC in two areas that were also covered by

specific programmes: nuclear fission safety and controlled thermonuclear fusion. Amount deemed necessary: ECU 300 million. Indicative breakdown by area: - Nuclear fission safety: ECU 254 million; - Controlled thermonuclear fusion: ECU 46 million. The actions included institutional research activities and institutional scientific and technical support activities. ?
