

European Agricultural Fund for Rural Development (EAFRD): support for rural development 2014-2020

2011/0282(COD) - 12/10/2011 - Legislative proposal

PURPOSE: to reform the Common Agricultural Policy (CAP) after 2013 (support for rural development by the European Agricultural Fund for Rural Development (EAFRD)).

PROPOSED ACT: Regulation of the European Parliament and of the Council.

BACKGROUND: the Commission presents a set of regulations laying down the legislative framework for the CAP in the period 2014-2020. The current reform proposals are based on the [Communication on the CAP towards 2020](#) that outlined broad policy options in order to respond to the future challenges for agriculture and rural areas and to meet the objectives set for the CAP, namely (1) viable food production; (2) sustainable management of natural resources and climate action; and (3) balanced territorial development.

A common theme that has emerged throughout this process is the need to promote resource efficiency with a view to smart, sustainable and inclusive growth for EU agriculture and rural areas in line with the Europe 2020 strategy, keeping the structure of the CAP around two pillars that use complementary instruments in pursuit of the same objectives.

- Pillar I covers direct payments and market measures providing a basic annual income support to EU farmers and support in case of specific market disturbances.
- Pillar II covers rural development where Member States draw up and co-finance multiannual programmes under a common framework.

The framework set out in the [Commission proposal for the multiannual financial framework for the years 2014-2020 \(MFF\)](#) proposal foresees that the CAP should maintain its two-pillar structure with the budget for each pillar maintained in nominal terms at its 2013 level and with a clear focus on delivering results on the key EU priorities.

- Direct payments should promote sustainable production by assigning 30% of their budgetary envelope to mandatory measures that are beneficial to climate and the environment.
- Payment levels should progressively converge and payments to large beneficiaries be subject to progressive capping.
- Rural development should be included in a Common Strategic Framework with other EU shared management funds with a reinforced outcome-orientated approach and subject to clearer, improved ex-ante conditionalities.
- Finally, on market measures the financing of the CAP should be reinforced with two instruments outside the MFF: (1) an emergency reserve to react to crisis situations; and (2) the extension of the scope of the European Globalization Adjustment Fund.

On this basis, the main elements of the legislative framework for the CAP during the period 2014-2020 are set out in the following regulations:

- [Proposal for a Regulation](#) of the European Parliament and of the Council establishing rules for direct payments to farmers under support schemes within the framework of the common agricultural policy ('the direct payments regulation');
- Proposal for a Regulation of the European Parliament and of the Council establishing a common organisation of the markets in agricultural products (Single CMO Regulation) ('the Single CMO regulation');
- [Proposal for a Regulation](#) of the European Parliament and of the Council on support for rural development by the European Agricultural Fund for Rural Development (EAFRD) ('the rural development regulation');
- [Proposal for a Regulation](#) of the European Parliament and of the Council on the financing, management and monitoring of the common agricultural policy ('the horizontal regulation');
- [Proposal for a Council Regulation](#) determining measures on fixing certain aids and refunds related to the common organisation of the markets in agricultural products;
- [Proposal for a Regulation](#) of the European Parliament and of the Council amending Council Regulation (EC) No 73/2009 as regards the application of direct payments to farmers in respect of the year 2013;
- [Proposal for a Regulation](#) of the European Parliament and of the Council amending Council Regulation (EC) No 1234/2007 as regards the regime of the single payment scheme and support to vine-growers.

The rural development regulation builds on the proposal presented by the [Commission on 6 October 2011](#) that sets out common rules for all funds operating under a Common Strategic Framework. A regulation will follow on the scheme for most deprived persons, for which funding is now placed under a different heading of the MFF.

In addition, new rules on the publication of information on beneficiaries taking account of the objections expressed by the Court of Justice of the European Union are also under preparation with a view to finding the most appropriate way to reconcile beneficiaries' right to protection of personal data with the principle of transparency.

IMPACT ASSESSMENT: the three scenarios elaborated in the impact assessment are:

- an adjustment scenario that continues with the current policy framework while addressing its most important shortcomings, such as the distribution of direct payments;
- an integration scenario that entails major policy changes in the form of enhanced targeting and greening of direct payments and reinforced strategic targeting for rural development policy in better coordination with other EU policies, as well as extending the legal base for a broader scope of producer cooperation; and
- a refocus scenario that reorients the policy exclusively towards the environment with a progressive phasing out of direct payments, assuming that productive capacity can be maintained without support and that the socio-economic needs of rural areas can be served by other policies.

The impact assessment concludes that the integration scenario is the most balanced in progressively aligning the CAP with the EU's strategic objectives. It will also be essential to develop an evaluation framework to measure the performance of the CAP with a common set of indicators linked to policy objectives.

LEGAL BASIS: Article 42 and Article 43 of the Treaty on the Functioning of the European Union (TFEU).

CONTENT: the proposed rural development Regulation builds on the strategic approach introduced in the current period, which has had a positive impact with Member States developing strategies and programmes on the basis of a SWOT (strengths, weaknesses, opportunities and threats) analysis to best tailor intervention to national and regional specificities. The new delivery mechanism aims at reinforcing the strategic approach among other things by setting clearly defined common priorities for rural development at EU level (with associated common target indicators) as well as by making the necessary adjustments in light of experience gained to date.

The proposed Regulation also includes the European Innovation Partnership on Agricultural Productivity and Sustainability which is aimed at promoting resource efficiency, building bridges between research and practice and generally encouraging innovation. The partnership acts through operational groups responsible for innovative projects and is supported by a network.

In this context, rural development policy retains the long-term strategic objectives of contributing to the competitiveness of agriculture, the sustainable management of natural resources and climate action and the balanced territorial development of rural areas. In line with the Europe 2020 strategy, these broad objectives of rural development support for 2014-2020 are given more detailed expression through the following six EU-wide priorities:

- fostering knowledge transfer and innovation in agriculture, forestry and rural areas;
- enhancing competitiveness of all types of agriculture and enhancing farm viability;
- promoting food chain organization and risk management in agriculture;
- restoring, preserving and enhancing ecosystems dependent on agriculture and forestry;
- promoting resource efficiency and supporting the shift towards a low-carbon and climate-resilient economy in the agriculture, food and forestry sectors;
- promoting social inclusion, poverty reduction and economic development in rural areas.

Within the overall framework of the CAP, support for rural development shall contribute to achieving the following objectives:

- the competitiveness of agriculture;
- the sustainable management of natural resources, and climate action;
- a balanced territorial development of rural areas.

One should also note that the current cooperation measure is significantly reinforced and extended to support a wide range of types of cooperation (economic, environmental and social) between a wide range of potential beneficiaries. It now explicitly covers pilot projects as well as cooperation crossing regional and national borders. Leader and networking approaches will continue to play a key role, in particular for the development of rural areas and the spreading of innovation. Support through Leader will be consistent and coordinated with the support for local development from other EU shared management funds. A prize for local innovative co-operation projects will support transnational initiatives in favour of innovation.

Lastly, a risk management toolkit including support to mutual funds and a new income stabilization tool offers new possibilities to deal with the strong volatility in agricultural markets that is expected to continue in the medium term.

BUDGETARY IMPLICATION: in current prices, it is proposed that the CAP should focus on its core activities with EUR 317.2 billion allocated to Pillar I and EUR 101.2 billion to Pillar II over the 2014-2020 period.

The Pillar I and Pillar II funding is complemented by additional funding of EUR 17.1 billion consisting of:

- EUR 5.1 billion for research and innovation,
- EUR 2.5 billion for food safety and
- EUR 2.8 billion for food support for the most deprived persons in other headings of the MFF,
- EUR 3.9 billion in a new reserve for crises in the agricultural sector,
- up to EUR 2.8 billion in the European Globalization Adjustment Fund outside the MFF, thus bringing the total budget to EUR 435.6 billion over the 2014-2020 period.

The total budget to EUR 435.6 billion over the 2014-2020 period.

Distribution of support among Member States: it is proposed that all Member States with direct payments below 90% of the EU average will see one third of this gap closed. The national ceilings in the direct payments regulation are calculated on this basis.

Rural development aid: this is based on objective criteria linked to the policy objectives taking into account the current distribution. As is the case today, less developed regions should continue to benefit from higher co-financing rates, which will also apply to certain measures such as knowledge transfer, producer groups, cooperation and Leader.

Lastly, some flexibility for transfers between pillars is introduced (up to 5% of direct payments): from Pillar I to Pillar II to allow Member States to reinforce their rural development policy, and from Pillar II to Pillar I for those Member States where the level of direct payments remains below 90% of the EU average.

DELEGATED ACTS: the proposal contains provisions empowering the Commission to adopt delegated acts in accordance with Article 290 of the Treaty on the Functioning of the European Union.
