

Imports of steel products from Russia: administering restrictions

2011/0315(COD) - 30/03/2012 - Committee report tabled for plenary, 1st reading/single reading

The Committee on International Trade adopted the report drafted by Robert STURDY (ECR, UK) on the proposal for a regulation of the European Parliament and of the Council repealing Council Regulation (EC) No 1342/2007 on administering certain restrictions on imports of certain steel products from the Russian Federation.

It recommends that the European Parliament adopts its position at first reading, following the ordinary legislative procedure, taking over the Commissions proposal.
