## Equivalence of forest reproductive material produced in the United Kingdom

2020/0378(COD) - 23/12/2020 - Legislative proposal

PURPOSE: to amend Council Decision 2008/971/EC as regards the equivalence of forest reproductive material produced in the United Kingdom to such material produced in the EU.

PROPOSED ACT: Decision of the European Parliament and of the Council

ROLE OF THE EUROPEAN PARLIAMENT: the European Parliament decides in accordance with the ordinary legislative procedure and on an equal footing with the Council.

BACKGROUND: in view of the end of the transitional period provided for in the withdrawal agreement, the United Kingdom has applied to the Commission for recognition of the equivalence, from 1 January 2021, of forest reproductive material produced in that country with that produced in the EU in accordance with the respective Union law.

The Commission has examined the relevant legislation of the United Kingdom. It has concluded that forest reproductive material, and in particular the categories source-identified, selected and qualified material, produced in the United Kingdom is equivalent to forest reproductive material produced in the EU, since the former affords the same assurances as regards the approval of its basic material and the measures taken for its production with a view to marketing as the latter.

CONTENT: the proposal adds the United Kingdom to the list of countries for which the Union recognises the equivalence of forest reproductive material, and in particular the categories source-identified, selected and qualified material, with the respective material produced within the Union. This recognition is based on an examination of the legislation applicable in the United Kingdom and the conclusion that its requirements and systems in place are equivalent to those of the Union.

Following the addition of the United Kingdom to the list of countries in Annex I to Decision 2008/97/EC, imports into the Union of forest reproductive material from the United Kingdom would be authorised.
